SEWER SYSTEM EXTENSION PERMIT

Location: _____

Tax Map #: _____ Lot #: _____ Parcel Number*: _____

Owner: _____ Phone: _____

Engineer: _____ Phone: _____

Description of Extension: _____

Number of Homes:

new _____

existing _____

Estimated Residential Flow:

new _____

existing _____

Commercial/Industrial Flow:

new _____

existing _____

Criteria for Approval

1. Was the sewer extension was shown on a Definitive Plan approved by the Planning Board prior to October 21, 1998?
2. Does the proposed sewer extension eliminate system overflows or other conditions which pose a public health threat?
3. Does the proposed sewer extension improve the capacity of an existing overloaded sewer line?
4. Does the proposed sewer extension eliminate the need for a pump station serving an existing residential development?
5. Is the proposed sewer extension required for the installation of a community sewage treatment plant to serve an existing residential development?
6. Will the proposed sewer extension, in the opinion of the Town Council, make a substantial improvement to public utility infrastructure or otherwise confer a significant public benefit, provided that the proposed extension by itself shall not be deemed to satisfy this criterion?
7. The Town Council may, upon a showing by the property owner of hardship, financial or otherwise, approve an extension to the map for an existing single building lot, upon which a single-family residential structure is or could otherwise be legally constructed, which directly abuts a lot which was serviced by an existing gravity sewer main as of the date of original adoption of this bylaw, and which does not satisfy any of the criteria listed above. Said extension shall be granted for the minimum linear distance necessary to provide the requested service. In approving the extension, the Council may either require extension of the existing main or permit connection by a service line and may impose other conditions to protect, maintain, or improve the public infrastructure.

Owner's explanation as to why the request meets or exceeds criteria:
