TRI-COUNTY VOCATIONAL HIGH SCHOOL PROJECT NARRATIVE

1.0 Introduction

The existing Tri-County Regional Vocational school site, located at 147 Pond Street in Franklin, The existing school building, constructed in 1977, is a multi-level steel framed, masonry clad building of approximately 285,000 square feet. The site is approximately 60.3 acres. There have been no additions.

The property is abutted by single family residences to the North and West. Larger condominium complex is located to the South/Southeast of the existing site. An open, wooded lot owned by the Town's Affordable Housing Trust is located to the east. The existing site has frontage along both Pond and Old West Central Street. The site slopes downgradient 80-100 feet in height from north/northwest to south/southwest, with the high point northeast of the property and the low point(s) at the bordering vegetated wetlands resource areas along the south and southwest portions of the site. All proposed development will occur on the northern/eastern sides of the wetlands delineation.

The Tri-County High School development will include a new a compact, three-story, rectangular design fitting into the available buildable area into the sloping behind the existing school. The building will be located on a newly created level area and will be accessed by both the existing driveway and a new access drive from the existing access road. The main entrance will be the focal point of the new entrance drive; framed by the three-story vertical stair tower and sloping roof of the library/learning commons. The proposed site include reconfigured athletic fields, parking/drive aisles, pedestrian connectivity (via sidewalks), landscaping, new utilities and a proposed stormwater management system designed in accordance with the Massachusetts DEP Stormwater Standards, as well as the Town of Franklin Stormwater Bylaw.

1.1 Existing Conditions

The Plan entitled T-1 "Topographic Plan of Land" (by Samiotes Consultants, Inc. last revised March 18, 2024 illustrates the existing conditions, topography, wetland resource areas, vegetation/trees, and hardscape areas using field survey data.

1.2 Regional Context

Land use surrounding the property is a single-family and multi-home residential area, with an open wooded lot located to the East of the school. SKCE-001 (Site Locus Plan) in the Appendix depicts the context of the property in relation to the neighborhood.

1.3 Resource Areas

On March 23, 2023 and February 1, 2024, Brad Holmes of ECR delineated the wetland resource areas throughout the property. The limits of the wetland resource areas are represented on the Topographic Plan of Land, noted in Section 1.1, and was used as the base plan in developing the proposed site improvements.

Wetlands were delineated in accordance with the procedures established in the Massachusetts Wetlands Protection Act Regulations (310 CMR 10.00) and the Town of Franklin Wetlands Bylaw. Numbered and sequence flags were placed in the field to identify the limit of wetland resource area.

A copy of the reports and data sheets are included in the Appendix.

An Abbreviated Notice of Resource Area Delineation (ANRAD) is currently on file with the Town, with an anticipated Order of Resource Area Delineation (ORAD) being issued in April 2024.

1.4 Wetland Resource Areas

The project site was found to contain a Bordering Vegetated Wetland (BVW) and Isolated Vegetated Wetlands (IVW) within the property limits and adjacent to the site. This wetland resource areas, delineated by flags:

- BVW A1 to A30
- BVW B1 to B40
- IVW C1 to C12
- BVW D1 to D17
- BVW F1 to F25
- IVW G1 to G13
- IVW 200-219 (Stormwater basin - Local jurisdictional resource area per bylaw only, not subject to MADEP WPA)
- IVW SW1-SW106; BA1-BA9 (Stormwater basin - Local jurisdictional resource area per bylaw only, not subject to MADEP WPA)

The “A” through “D” wetlands are located to the southwest of the school and the “G” and “F” wetlands are located within the northwestern portion of the site. Local jurisdictional resource areas located within the existing solar field.

1.5 Bordering Land Subject to Flooding

This site does not contain areas mapped as Land Subject to Flooding (FEMA Flood Zones). SKCE-003 FEMA Flood Zones map is included within the appendix.

1.6 Estimated Habitats of Rare Wetlands Wildlife

The project area is not within Estimated Habitat of Rare Wetlands Wildlife or Priority Habitat and contains no certified vernal pools as determined by reference to Massachusetts Division of Fisheries and Wildlife – Natural Heritage and Endangered Species Program (NHESP) data available on MassGIS. SKCE-004 NHESP map is included within the appendix.

2.0 Project Description

The Tri-County High School development will include a new a compact, three-story, rectangular design fitting into the available buildable area into the sloping behind the existing school. The building will be located on a newly created level area and will be accessed by both the existing driveway and a new access drive from the existing access road. The main entrance will be the focal point of the new entrance drive; framed by the three-story vertical stair tower and sloping roof of the library/learning commons. The proposed site will include reconfigured athletic fields, parking, pedestrian connectivity (via sidewalks), landscaping, new utilities and a proposed stormwater management system designed in accordance with the Massachusetts DEP Stormwater Standards, as well as the Town of Franklin Stormwater Bylaw.

The Stormwater Report included with this submission (under separate cover) details our analysis of the hydrological function and stormwater improvements of the site.

3.0 Construction Impacts and Mitigation on areas subject to protection Under M.G.L c. 131, & 40 and Town of Franklin Wetlands Protection By-law Rules and Regulations

A No Disturb and No Build bylaw indicated in the Franklin Wetlands Protection By-law Rules and Regulations, states a variance must be proposed and submitted to the Franklin Conservation Commission with regulations for a compensation area of 1:5 to 1 for Landscaping within these zones. See attached proposed waivers, disturbance plan, and landscape plan.

An Alternative Analysis has been submitted to demonstrate efforts to limit impact to the resource areas and their associated buffer zones as required per the Conservation Commission Bylaw.

3.1 Vegetated Wetland Resource Areas

Preamble:

Vegetated Wetland Resource Areas are likely to be significant to public or private water supply, to ground water supply, to flood control, to storm damage prevention, to prevention of pollution, to the protection of fisheries and to wildlife habitat. The plants and soils of Vegetated Wetlands remove or detain sediments, nutrients (such as nitrogen and phosphorous) and toxic substances (such as heavy metal compounds) that occur in run-off and flood waters. The profusion of vegetation in Bordering and Isolated Vegetated Wetlands acts to slow down and reduce the passage of flood waters during periods of peak flows by providing temporary flood water storage and by facilitating water removal through evaporation and transpiration. This process reduces downstream flood crests and resulting damage to private and public property. During dry periods the water retained in Bordering and Isolated Vegetated Wetlands is essential to the maintenance of base flow levels in rivers and streams, which in turn is important to the protection of water quality and water supplies.

Performance Standard:

No work is proposed to the Bordering Vegetated Wetland (BVW) or Isolated Vegetated Wetlands (IVW) as defined by the Massachusetts Wetlands Protection Act (WPA). However, existing stormwater basins serving the solar field are considered resource areas in accordance with the the Town of Franklin Wetlands Bylaw. Portions of the proposed development (e.g. new building, roadway, etc) are proposed within these areas.

Area within the IVW 200-219 Wetland to be filled

Post-Development condition: 2,195 sf impervious and 1,919 sf pervious.
A net increase of 4,114 sf.

Area within the IVW SW1-SW106;BA1-BA9 Wetland to be filled

Post-Development condition: 1,518 sf impervious and 642 sf pervious.
A net increase of 2,160 sf.

3.2 No Disturb and No Build Buffer Zones to Resource Areas (Town of Franklin Wetlands Regulations)

No Disturb Buffer Zone

4.1.2. Currently as established by precedent, the Commission has instituted a no disturb buffer zone that extends 25 feet from the defined/delineated resource area. Extensive work in this zone, particularly clearing of natural vegetation and soil disturbance is likely to alter the physical characteristics of resource areas by changing their soil composition, topography, hydrology, temperature, and the amount of light received. Soil and water chemistry within resource areas may be adversely affected by work in the buffer zone. As a result of the buffer zone alterations, biological conditions in adjacent resource areas may include changes in plant community composition and structure, invertebrate and vertebrate biomass and species composition, and nutrient cycling. The affects from work in the buffer zone will most likely result in the disruption and erosion of soil, loss of shading, reduction in nutrient inputs, and changes in litter and soil composition that filters runoff, and serves to attenuate pollutants and sustain wildlife habitat within resource areas. For these stated reasons, the Commission is codifying the requirement not to disturb the 0-25 foot buffer zone around the defined/delineated resource area.

Area within the 0 to 25-foot No-Disturb Zone buffer zone

An applicant shall demonstrate that no work/disturbance including grading activities is proposed within the 0-25 foot buffer zone resource area. Any applicant proposing a project within the 0-25 foot buffer zone resource area will have an irrefutable presumption of significant adverse impact to the functions and characteristics of the resource area, unless otherwise determined by the Commission under the minor buffer zone activity criteria set forth in Section 2 of these regulations, or as approved by the Commission by the variance procedures set forth in Section 5 of the regulations.

Pre-Development condition: 0 sf of permanent disturbance

Area within the 25-foot No-Disturbance Zone buffer zone

Post-Development condition: 27,229 sf of permanent disturbance
A net increase of 27,229 sf.

No Build Buffer Zone

4.1.3. These regulations will also characterize and provide regulatory guidance as to the type of projects that would most likely be acceptable to the commission in the zone that extends from 25-50 feet from the defined/delineated resource area ("25- 50 foot buffer zone" as well as the foot buffer zone that extends 50-100 feet from the defined/delineated resource area ("50-100 foot buffer zone"). in order to be consistent with the amendments to the Massachusetts Wetland Protection Act found in 310 CMR 10.00 relative to a simplified review process, as well as protect the 50 foot buffer zone resource area where the functions and characteristics of the resource area are most critical.

Any applicant proposing a project within the 25-50 foot buffer zone resource area shall indicate that there are no structures including but not limited to, concrete, stone, or other impervious foundations and/or slabs for construction purposes that for all intents and purposes would significantly increase runoff. Alteration in the 25-50 foot buffer zone resource area is limited to grading, tree clearing. Stormwater management system components, lawns, gardens, and other low impact uses as

determined by the Commission or as otherwise approved by the Commission by the variance procedures set forth in Section XVII of these regulations. Footings for building structures, such as a deck, as opposed to slabs or foundations, shall be used when technically feasible. The Commission may condition the applicant to use Best Management Practices (BMP's) for stormwater management consistent with the most recent version of the Town of Franklin Best Development Practice Guidebook. Stormwater management systems or individual components including drainage piping, and construction of detention/retention ponds shall be allowed by the Commission based on an alternative analysis and review of design and space limitations as indicated in the final approved plans.

Performance Standards:

Under the Town of Franklin Wetlands Bylaw Rules and Regulations Section VI, there is a 25-50 foot "No Build" at the site that is subject to Conservation Commission jurisdictional review. The pre-development conditions of the site within this area is a mix of woods and grassed areas.

Area within the 25-50-foot "No Build"

Pre-Development condition 0 sf of permanent

Area within the 25-50-foot "No Build"

Post-Development condition: 36,963 sf of permanent disturbance

Net increase of 36,963 square feet.

3.3 Buffer Zone to Bordering Vegetated Wetlands (Under the Massachusetts Wetlands Protection Act M.G.L c. 131, & 40 and Town of Franklin Wetlands Regulations)

Preamble:

4.1.1. The Town of Franklin considers 100 feet from a defined/delineated resource area as the buffer zone and consequently an additional protected resource. Floodplains, lands within 100 feet of other resource areas and within 200 feet of rivers and perennial streams, and the resources areas, are presumed significant to the protection of functions and characteristics of these areas because activities undertaken in close proximity have a high likelihood of adverse impact upon them, either immediately, as a consequence of construction, or over time, as a consequence of daily operation or existence of the activities. These adverse impacts from construction and use can include, without limitation, erosion, siltation, loss of groundwater recharge, poor water quality and loss of wildlife habitat. Any person in Franklin that proposes a project that is within the 100 foot buffer zone resource area is required to submit a Notice of Intent to the Franklin Conservation Commission. (the Commission) If at all possible, an applicant may site all construction activities including grading beyond the 100 foot buffer zone resource area and not have to go through a public hearing and a possible permitting process.

Extensive work in the inner portion of the buffer zone, particularly clearing of natural vegetation and soil disturbance is likely to alter the physical characteristics of resource areas by changing their soil composition, topography, hydrology, temperature, and the amount of light received. Soil and water chemistry within resource areas may be adversely affected by work in the buffer zone. Alterations to biological conditions in adjacent resource areas may include changes in plant community composition and structure, invertebrate and vertebrate biomass and species composition, and nutrient cycling. These alterations from work in the buffer zone can occur through the disruption and erosion of soil, loss of shading, reduction in nutrient inputs, and changes in litter and soil composition that filters runoff, serving to attenuate pollutants and sustain wildlife habitat within resource areas.

Performance Standards:

In the pre-development condition there is a 100' jurisdictional wetland buffer located on the site. The pre-development conditions within this area consists of a mix of wooded and grassed areas.

Area within the 100-foot buffer zone

Pre-Development condition: 0 sf of permanent disturbance

Area within the 100-foot no disturb buffer zone

Post-Development condition: 121,350 sf of permanent disturbance

A net increase of 121,350 sf.

3.4 Bordering Land Subject to Flooding (BLSF)

This site does not contain areas mapped as Land Subject to Flooding (FEMA Flood Zones)

4.0 Soil Erosion and Sediment Control Plan

The objectives of the Soil Erosion and Sediment Control Plan are to control erosion at its source with temporary control structures, minimize the runoff from areas of disturbance, and de-concentrate and distribute stormwater runoff through natural vegetation before discharge to critical zones such as streams or wetlands. The Soil Erosion and Sediment Control Plan will be conducted in order to protect the resource areas during construction. The erosion control devices will remain in place until all exposed areas have been stabilized with vegetation or impervious surfaces.

- A. The Contractor shall implement all soil erosion and sediment control devices prior to excavation within the site.
- B. The following erosion control principles shall apply to the land grading and construction phases:
 - Stripping of vegetation, grading, or other soil disturbance shall be done in a manner which will minimize soil erosion.
 - Whenever feasible, natural vegetation shall be retained and protected.
 - Extent of area which is exposed and free of vegetation and duration of its exposure shall be kept within practical limits.
 - Temporary seeding, mulching, or other suitable stabilization measures shall be used to protect exposed critical areas during prolonged construction or other land disturbance.
 - Sediment shall be retained on-site.
 - Erosion control devices shall be installed as early as possible in the construction sequence prior to the start of grubbing and earthwork operations and excavation work.

4.1 Erosion Control Devices

1. Compost filter sock/Siltation fence

Compost filter sock shall consist of compost material inside tubular non-woven photodegradable high-density polypropylene (HDPE) netting with a one year UV inhibitor. Socks shall have a diameter of 9 in. to 12 in. (plus or minus 10 percent). Length shall be manufacturer's standard length.

Installation and Maintenance

- a. Filter socks and siltation fence shall be constructed and installed as indicated on the drawing, prior to the start of grubbing and earthwork operations. Prior to the start of clearing and grubbing operations, Conservation Commission representative(s) and the Civil Engineer shall inspect and approve the installation of all soil erosion and sediment control measures.
- b. Sedimentation shall be removed from filter socks when sediment has accumulated to greater than 6 inches deep. Sediment deposits shall be disposed of in a manner that will not cause a sediment nuisance elsewhere.
Compost filter socks shall be inspected periodically and replaced if deteriorated until such time as construction is completed and exposed slopes have been stabilized.
- c. Filter sock barrier shall remain in place until exposed soils have been stabilized with a vegetative cover.

2. Catch Basin Filters

The filters will be manufactured to fit the opening of the catch basins, area drains, and drywells inlets. The filters will have the following features:

- Two dump straps attached at the bottom to facilitate the emptying of the filters.
- The filters will also have lifting loops as an integral part of the system to be used to lift the filters from the basin.
- The filters will have a restraint cord approximately halfway up the sack to keep the sides away from the catch basin walls; this yellow cord shall also be a visual means of indicating when the sack should be emptied.
- Filters shall be removed once paving is completed but not prior to installation of oil hoods. Filters in landscaped areas (or subject to runoff from landscaped areas) shall remain until vegetation is established.

Installation and Maintenance

- a. Silt sacks or approved equal shall be installed where shown on the plans.
- b. Silt sacks or approved equal shall be installed in all new drain lets as soon as the structure is installed.
- c. Once the strap is covered the filter shall be emptied, cleaned and reinstalled.

3. Construction Entrance

The construction entrance shall consist of filter fabric, a layer of clean, crushed stone, ranging from 1-1/2" to 2-1/2" in size, and a top dressing of clean 2" crushed stone. Geotextile Fabric shall consist of long-chain synthetic polymers, composed of at least 85% by weight polyolefins, polyesters, or polyamides. They shall be formed into a network such that the filaments or yarns retain dimensional stability relative to each other, including selvages. The geotextile fabric shall have the following properties:

<u>Property (ASTM Test Method)</u>	<u>Unit</u>	<u>Typical Values</u>
Grab Strength (D-4632-86)	lbs	100
Grab Elongation (D-4632-86)	%	30 (Max)
Trapezoid Tear Strength (D-4533-85)	lbs	65
Mullen Burst Strength (D-3786-80a)	psi	280
Coeff. of Permeability (D-4491-85)	cm/sec	0.01
Water Flow Rate (D-4491-85)	gal/min/(ft)(ft)	35
Ultraviolet Stability (D-4355-84)	%	90

4. Dust Control

Water will be applied by sprinkler or water truck as necessary during grading operations in order to minimize sediment transport and maintain acceptable air quality conditions. Repetitive treatments will be done as needed until the grades are paved or seeded.

5. Temporary seed cover

Grass seed for temporary seed cover shall be the previous year's crop. Not more than 0.1% by weight shall be weed seed and not more than 1.75% by weight shall be crop seed. Seed shall be delivered to the site in sealed containers, labeled with name of seed grower and seed formula, in form stated below. Seed shall be dry and free of mold. Seed shall meet the following requirements:

Species Name	% by Weight	Minimum % in Mixture	Minimum % Germination Purity
Chewing Fescue (Festuca Rubra Comutata)	25	85	97
Alta Fescue (Festuca Arundinacea)	30	85	97
Annual Rye Grass (Lolium Multiflorum)	20	90	98
Red Top (Agrostis Alba)	15	90	92
White Clover (Trifolium Repens)	10	90	98

Installation

- a. At the Contractor's option, seed may be spread by the hydro-seeding method, utilizing power equipment commonly used for that purpose. Seed and mulch shall be mixed and applied to achieve application quantities specified herein for the conventional seeding method, with mulch applied at the rate of 2700 lb. dry weight of mulch per acre. A mulching machine, acceptable to the Civil Engineer, shall be equipped to eject the thoroughly wet mulch material at a uniform rate to provide the mulch coverage specified.
- b. If the results of hydro-seeding are unsatisfactory, the mixture and/or application rates and methods shall be modified to achieve the desired results.
- c. After the grass has appeared, all areas and parts of areas which fail to show a uniform stand of grass, for any reason whatsoever, shall be re-seeded repeatedly if necessary, until all areas are covered with a satisfactory growth of grass.
- d. If seeding cannot be established due to weather conditions, jute mesh shall be placed on the surface to reduce soil erosion.

6. Jute Mesh

Jute mesh shall be a uniform, open, plain weave cloth of undyed and unbleached single jute yarn. The yarn shall be of a loosely twisted construction and it shall not vary in thickness more than one-half its normal diameter. Jute mesh shall be furnished in rolled strips and shall meet the following requirements:

- Width - 48 inches, plus or minus one inch
- 78 warp - ends per width of cloth (minimum)
- 41 weft - ends per yard (minimum)
- Weight shall average 1.22 pounds per linear yard with a tolerance of plus or minus 5%.

Mesh shall be secure using U-shaped staples.

5.0 Stormwater Management Standards

The Department of Environmental Protection has implemented the Stormwater Management Standards as of November 18, 1996 and updated them in April 2008. The standards met are described in the Stormwater Management Form as provided by DEP. We have met all ten standards that are applicable to this project to the maximum extent practical. Additionally, we have designed the on-site stormwater management system to meet the Town of Franklin Stormwater Bylaw regulations. See the stormwater management report submitted as part of the NOI submission.

Town of Franklin Conservation Commission

NOTICE OF INTENT PACKET

This packet contains information and application forms necessary for all Notice of Intent (NOI) applications. This packet consists of the following:

1. Instructions for Completing an NOI in the Town of Franklin
2. Application Process Signature Form
3. Property Access Signature Form
4. Local Filing Fee Calculation Worksheet
5. Resource Area Impact Summary Form
6. Notification to Abutters
7. Affidavit of Service
8. DEP's WPA Form 3 – NOI Application Form
9. DEP's BRP WPA Form 3 - NOI Instructions and Supporting Materials
10. DEP's NOI Wetland Fee Transmittal Form
11. DEP's Checklist for Stormwater Report
12. DEP's Bordering Vegetated Wetland Delineation Field Data Form

It is important to note that there are some applications that do not require the level of detail and information required for an NOI. The forms for a Minor Buffer Zone Activity (MBZA) and a Request for Determination of Applicability (RDA), for example, are in separate documents that are available electronically on the Conservation Commission's webpage and in the Conservation Department at Town Hall.

If you are proposing any work within 100' of a wetlands resource area, additional local regulations will apply. These are in the Regulations of the Franklin Conservation Commission and are in a separate document that is available electronically on the Conservation Commission's webpage and in the Conservation Department at Town Hall.

All questions should be directed to the Conservation Department at 508-520-4929. In order to save everyone time and expense, it is recommended that the Department be contacted BEFORE an NOI is filed to make sure all information is contained in the packets and to determine the filing fees and date and time of the hearing. Also, by state law there are legal, procedural requirements that must be met before construction can begin. These will be outlined in the approved permit.

INSTRUCTIONS FOR COMPLETING A NOTICE OF INTENT IN THE TOWN OF FRANKLIN

The Massachusetts Wetlands Protection Act Regulations (310 CMR 10.00) require the use of state forms for the above permit application. The forms can be found on the State's Department of Environmental Protection website and at the end of this application packet.

In addition, under the Franklin Wetlands Protection Bylaw, Franklin Town Code Chapter 181 and the Wetlands Regulations promulgated under the Bylaw, the Town requires applicants to follow specific procedures and submit additional documents.

All NOIs will be peer reviewed by an outside consultant as allowed under the Town of Franklin Ch. 181 Wetlands Protection Bylaw and MGL Ch. 44 Section 53G. A hardcopy of the entire application must be sent, at the same time as submitted to the Franklin Conservation Department, and a PDF sent to bgoodlander@franklinma.gov and mcrowley@beta-inc.com.

SUBMITTAL REQUIREMENTS

The Notice of Intent (NOI) package submitted to the Franklin Conservation Commission shall comply with the format and content requirements below. Forms specific to the Town of Franklin are described and provided as attachments to this document.

When filing a Notice of Intent (NOI), the original hardcopy, one (1) additional hardcopy, two (2) full-sized sets of plans, and seven (7) reduced 11"x17" sets of plans are to be submitted to the Franklin Conservation Commission via mail or hand delivery. The application and plan must also be submitted electronically to the Conservation Department at bgoodlander@franklinma.gov and the Department of Public Works at mmaglio@franklinma.gov. One (1) additional copy must be submitted to the Department of Environmental Protection.

All applications must be signed by the property owner.

Any additional material to be discussed by the Conservation Commission should be submitted to the Conservation office no later than 12:00 PM the Friday before the Commission hearing. The Commission reserves the right to waive that deadline.

A. COVER PAGE

Each copy of the NOI Application shall be separately bound and include a cover sheet with the following information:

1. Application Type
2. Prepared for (Applicant)
3. Prepared by (Representative)
4. Date

B. NOTICE OF INTENT APPLICATION FORMS

1. *Notice of Distribution Form
2. Application Process Signature Form
3. Property Access Signature Form
4. NOI Application Form (DEP's WPA Form 3)
5. NOI Wetland Fee Transmittal Form (DEP's Form)
6. Local Filing Fee Calculation Worksheet
7. Copies of Checks to DEP and Town
8. Resource Area Impact Summary Form
9. DEP's Checklist for Stormwater Report (if stormwater report is applicable)
10. DEP's Bordering Vegetated Wetland Delineation Field Data Form

C. PROJECT DESCRIPTION

The project description must explain all that the project entails. This includes what the activity is, all the associated amenities, and distances from the limit of work to the resource areas.

D. FUNCTIONS & CHARACTERISTICS STATEMENT

The purpose of the Franklin Wetlands Protection Bylaw is to regulate and control activities deemed to have a significant or cumulative effect on the functions and characteristics of floodplains and wetlands. In order to make this determination the Commission requires that the applicant prepare a statement that describes whether the project will have an adverse effect on these functions and characteristics. If the proposed project will have an effect on one or more functions or characteristics, then a mitigation plan must be prepared and submitted (see Section K).

The functions and characteristics to address include but are not limited to the following:

1. **Public Water Supplies** - Distance from proposed project to nearest public wells.
2. **Private Water Supplies** - Distance to nearest private wells.

3. **Groundwater** - Depth to groundwater as well as impacts associated with construction (i.e. digging or blasting) and operations (water use, use of toxic or hazardous materials, and stormwater management).
4. **Flood Control** - Work within the 100-year flood plain must address compensatory storage.
5. **Erosion and Sedimentation** - This item must be addressed for both the construction and post construction conditions at the property.
6. **Storm Damage Prevention** - Address whether or not the project will have an adverse effect on the way that the wetland or flood plain will be able to minimize water and wind related impacts during large-scale storm events.
7. **Water Quality** - This item must be addressed for both the construction and post construction conditions at the property. This item will address the quality of the surface waters associated with the resource area being impacted by the project.
8. **Water Pollution Control** - This item must be addressed for both the construction and post construction conditions at the property.
9. **Fisheries** - Reserved for work taking place adjacent to ponds and perennial streams. The response must address both the construction and post construction conditions at the property.
10. **Shellfish** - Not applicable in Franklin.
11. **Wildlife Habitat** - This item must be addressed for both the construction and post construction conditions at the property.
12. **Rare Species Habitat** (including rare plant species) - This item must be addressed for both the construction and post construction conditions at the property.
13. **Agriculture** - This item must be addressed for both the construction and post construction conditions at the property.
14. **Aquaculture** - To date there are no aquaculture operations in Franklin.
15. **Recreation** - This item must be addressed for both the construction and post construction conditions at the property and include both passive and active recreational uses.

E. VERNAL POOL STATEMENT

A statement is required by the applicant of whether there are Potential and/or Certified Vernal Pools onsite or on abutter parcels. This information is available at the MassGIS (MassMapper) website under the Conservation/Recreation/Natural Heritage Data page.

F. ABUTTER NOTIFICATION

The NOI application shall contain the documents listed below in the following order:

1. Notification to Abutters
2. Affidavit of Service
3. Certified Abutters List from the Assessor's Office (do not rewrite the list)

The process of notifying the abutters to a proposed project requires that the applicant take the following steps:

1. Obtain a Certified Abutters List from the Assessor's Office. Applicants are required to notify all abutting property owners within 300 feet of their property lines. The original certified copy of the abutters list must be submitted with the Notice of Intent Application.
2. Complete the Notification to Abutters. A copy of this notification must be sent either by Certificate Mail or by hand delivery to each landowner on the Certified Abutters List.
3. The Affidavit of Service is a required document under the Wetlands Protection Act. The applicant must copy and fill out the Affidavit of Service as evidence that the applicant, in accordance with the law, has notified the abutters to the proposed project site.

G. MAPS

A copy of the most recent revisions of the following maps must be submitted with the project locus depicted:

1. USGS Topographic Map
2. Natural Heritage & Endangered Species Estimated Habitat Maps
3. FEMA Flood Plain Map

H. DEP FIELD DATA FORMS

DEP's Bordering Vegetated Wetland Delineation Field Data Form can be found at the end of this packet and also on the Mass.gov website under Wetlands Permitting Forms. Completed forms and/or written report prepared by the wetland's delineator must be submitted with the NOI application.

A copy of the recorded Order of Resource Area Delineation (ORAD) may be substituted for the DEP Field Data Sheets if a determination has been issued by the Commission within the last three (3) years.

I. EROSION & SEDIMENTATION CONTROL NARRATIVE

This narrative describes the measures that will be taken to properly install and maintain the erosion control devices used during the project. The narrative must also include the names and phone numbers of all individuals who will be responsible for erosion control as well as the requirement that the erosion control be inspected weekly and after significant rain events. The individual responsible for inspection and maintenance shall

keep a log of the inspections and maintenance and be prepared to show it to the Conservation Agent and Commissioners upon request. The text from the narrative will also appear in the plan set, preferably on the sheet that depicts the erosion control location and detail.

Please note that it is a requirement in Franklin that the engineering detail used on the project plan must depict the erosion control measures to be installed. There may also be a special condition in the Orders, if issued, requiring that there be additional erosion control devices stored under cover on site in the event of an emergency. Straw hay-bales/wattles AND filter fabric are NOT to be used for erosion control.

J. ALTERNATIVES ANALYSIS

The following project types shall require the submission of an Alternatives Analysis narrative:

1. Riverfront Resource Area
2. Septic System Components within the 100-Foot Buffer Zone Resource Area
3. Wetland filling up to 5,000 square feet

The Alternatives Analysis shall comply with the requirements as presented in 310 CMR 10.58 (4).

K. MITIGATION NARRATIVE

This narrative shall be included in the NOI and will describe the application of the “avoid, minimize and mitigate calculus” during project planning. That is, Applicants must demonstrate that efforts have been made to avoid wetland impacts wherever possible, minimize the impacts when unavoidable, and mitigate these impacts by employing replication or restoration components in the proposed project plans.

When undisturbed areas within the Buffer Zone Resource Area are proposed for alteration, a separate narrative must be prepared describing the steps taken to mitigate for the impacts. This may include the use of plantings from the Town of Franklin’s Best Development Practices Guidebook (available from the Conservation Department or from the website (www.franklin.ma.us) for wildlife habitat enhancement or other physical components that will compensate for the loss of resource area functions.

L. REPLICATION NARRATIVE & PROTOCOL

When wetland alteration is necessary, the Commission shall require that the applicant replicate the altered wetland at a 2:1 ratio (the replication area must be twice the square footage of the natural wetland area impacted). The narrative submitted shall comply with the requirements as presented in the most recent revision of DEP’s Massachusetts Inland Wetland Replication Guidelines. The replication narrative, protocol, and schedule

shall also appear in the approved plan set along with cross sections of altered and proposed replicated areas, ground water elevation data, and planting lists and details.

M. CONSTRUCTION SEQUENCE AND SCHEDULE

A detailed sequence of activities proposed shall be depicted in the approved plan set and in the NOI application as well.

N. DRAINAGE CALCULATIONS

If drainage calculations are required, they must be submitted with the NOI application. Calculations must be prepared by a Civil Engineer licensed to practice in Massachusetts. DEP's Checklist for Stormwater Report should be attached to the top of any drainage reports.

O. PLANS

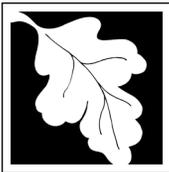

See Instructions and Supporting Materials for completing an NOI issued by DEP. In addition, the Franklin Conservation Department requires the following:

1. Index of sheets on cover page if submitting more than one sheet
2. The North arrow must have a reference
3. Existing topography as prepared by a registered land surveyor
4. Proposed topography as prepared by a registered land surveyor
5. Existing structures, improvements and limits of disturbance
6. Each Resource Area identified and labeled (including Buffer Zone)
7. Locations of erosion controls
8. Cross sections of impacted Bordering Vegetated Wetlands including ground water elevation information
9. Cross sections of proposed replication area(s)
10. Appropriate details to explain any activities to be undertaken.
11. Planting list(s) with species recommended in the most recent revision of the Franklin Best Development Practices Guidebook
12. Construction Sequence and Schedule

P. ADDITIONAL INFORMATION

Any other supplementary information that the Applicant determines to be relevant to the Commission reaching a decision on the proposed project may be included in this section of the application package.

If you need further assistance, please contact the Conservation Department at (508) 520-4929 or visit our web site www.franklin.ma.us

A. General Information (continued)

6. General Project Description:

7a. Project Type Checklist: (Limited Project Types see Section A. 7b.)

- 1. Single Family Home
- 2. Residential Subdivision
- 3. Commercial/Industrial
- 4. Dock/Pier
- 5. Utilities
- 6. Coastal engineering Structure
- 7. Agriculture (e.g., cranberries, forestry)
- 8. Transportation
- 9. Other

7b. Is any portion of the proposed activity eligible to be treated as a limited project (including Ecological Restoration Limited Project) subject to 310 CMR 10.24 (coastal) or 310 CMR 10.53 (inland)?

- 1. Yes No If yes, describe which limited project applies to this project. (See 310 CMR 10.24 and 10.53 for a complete list and description of limited project types)

2. Limited Project Type

If the proposed activity is eligible to be treated as an Ecological Restoration Limited Project (310 CMR10.24(8), 310 CMR 10.53(4)), complete and attach Appendix A: Ecological Restoration Limited Project Checklist and Signed Certification.

8. Property recorded at the Registry of Deeds for:

Worcester

a. County

5110, 5122, 5125

c. Book

b. Certificate # (if registered land)

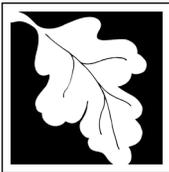

464, 165, 310

d. Page Number

B. Buffer Zone & Resource Area Impacts (temporary & permanent)

- 1. Buffer Zone Only – Check if the project is located only in the Buffer Zone of a Bordering Vegetated Wetland, Inland Bank, or Coastal Resource Area.
- 2. Inland Resource Areas (see 310 CMR 10.54-10.58; if not applicable, go to Section B.3, Coastal Resource Areas).

Check all that apply below. Attach narrative and any supporting documentation describing how the project will meet all performance standards for each of the resource areas altered, including standards requiring consideration of alternative project design or location.

e. <input type="checkbox"/> Isolated Land Subject to Flooding	1. square feet	
	2. cubic feet of flood storage lost	3. cubic feet replaced
f. <input type="checkbox"/> Riverfront Area	1. Name of Waterway (if available) - specify coastal or inland	

2. Width of Riverfront Area (check one):

- 25 ft. - Designated Densely Developed Areas only
- 100 ft. - New agricultural projects only
- 200 ft. - All other projects

3. Total area of Riverfront Area on the site of the proposed project: _____ square feet

4. Proposed alteration of the Riverfront Area:

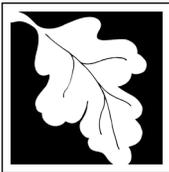

a. total square feet _____ b. square feet within 100 ft. _____ c. square feet between 100 ft. and 200 ft. _____

5. Has an alternatives analysis been done and is it attached to this NOI? Yes No

6. Was the lot where the activity is proposed created prior to August 1, 1996? Yes No

3. Coastal Resource Areas: (See 310 CMR 10.25-10.35)

Note: for coastal riverfront areas, please complete **Section B.2.f.** above.

C. Other Applicable Standards and Requirements

- This is a proposal for an Ecological Restoration Limited Project. Skip Section C and complete Appendix A: Ecological Restoration Limited Project Checklists – Required Actions (310 CMR 10.11).

Streamlined Massachusetts Endangered Species Act/Wetlands Protection Act Review

1. Is any portion of the proposed project located in **Estimated Habitat of Rare Wildlife** as indicated on the most recent Estimated Habitat Map of State-Listed Rare Wetland Wildlife published by the Natural Heritage and Endangered Species Program (NHESP)? To view habitat maps, see the *Massachusetts Natural Heritage Atlas* or go to http://maps.massgis.state.ma.us/PRI_EST_HAB/viewer.htm.

- a. Yes No **If yes, include proof of mailing or hand delivery of NOI to:**

**Natural Heritage and Endangered Species Program
Division of Fisheries and Wildlife
1 Rabbit Hill Road
Westborough, MA 01581**

b. Date of map _____

If yes, the project is also subject to Massachusetts Endangered Species Act (MESA) review (321 CMR 10.18). To qualify for a streamlined, 30-day, MESA/Wetlands Protection Act review, please complete Section C.1.c, and include requested materials with this Notice of Intent (NOI); OR complete Section C.2.f, if applicable. *If MESA supplemental information is not included with the NOI, by completing Section 1 of this form, the NHESP will require a separate MESA filing which may take up to 90 days to review (unless noted exceptions in Section 2 apply, see below).*

- c. Submit Supplemental Information for Endangered Species Review*

1. Percentage/acreage of property to be altered:

(a) within wetland Resource Area _____
percentage/acreage

(b) outside Resource Area _____
percentage/acreage

2. Assessor's Map or right-of-way plan of site

2. Project plans for entire project site, including wetland resource areas and areas outside of wetlands jurisdiction, showing existing and proposed conditions, existing and proposed tree/vegetation clearing line, and clearly demarcated limits of work **

(a) Project description (including description of impacts outside of wetland resource area & buffer zone)

(b) Photographs representative of the site

* Some projects **not** in Estimated Habitat may be located in Priority Habitat, and require NHESP review (see <http://www.mass.gov/eea/agencies/dfg/dfw/natural-heritage/regulatory-review/>). Priority Habitat includes habitat for state-listed plants and strictly upland species not protected by the Wetlands Protection Act.

** MESA projects may not be segmented (321 CMR 10.16). The applicant must disclose full development plans even if such plans are not required as part of the Notice of Intent process.

City/Town

C. Other Applicable Standards and Requirements (cont'd)

(c) MESA filing fee (fee information available at http://www.mass.gov/dfwele/dfw/nhesp/regulatory_review/mesa/mesa_fee_schedule.htm). Make check payable to “Commonwealth of Massachusetts - NHESP” and **mail to NHESP** at above address

Projects altering 10 or more acres of land, also submit:

(d) Vegetation cover type map of site

(e) Project plans showing Priority & Estimated Habitat boundaries

(f) OR Check One of the Following

1. Project is exempt from MESA review. Attach applicant letter indicating which MESA exemption applies. (See 321 CMR 10.14, http://www.mass.gov/dfwele/dfw/nhesp/regulatory_review/mesa/mesa_exemptions.htm; the NOI must still be sent to NHESP if the project is within estimated habitat pursuant to 310 CMR 10.37 and 10.59.)

2. Separate MESA review ongoing. a. NHESP Tracking # _____ b. Date submitted to NHESP _____

3. Separate MESA review completed. Include copy of NHESP “no Take” determination or valid Conservation & Management Permit with approved plan.

3. For coastal projects only, is any portion of the proposed project located below the mean high water line or in a fish run?

a. Not applicable – project is in inland resource area only b. Yes No

If yes, include proof of mailing, hand delivery, or electronic delivery of NOI to either:

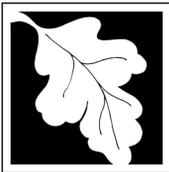

South Shore - Cohasset to Rhode Island border, and the Cape & Islands:

North Shore - Hull to New Hampshire border:

Division of Marine Fisheries -
Southeast Marine Fisheries Station
Attn: Environmental Reviewer
836 South Rodney French Blvd.
New Bedford, MA 02744
Email: DMF.EnvReview-South@state.ma.us

Division of Marine Fisheries -
North Shore Office
Attn: Environmental Reviewer
30 Emerson Avenue
Gloucester, MA 01930
Email: DMF.EnvReview-North@state.ma.us

Also if yes, the project may require a Chapter 91 license. For coastal towns in the Northeast Region, please contact MassDEP’s Boston Office. For coastal towns in the Southeast Region, please contact MassDEP’s Southeast Regional Office.

C. Other Applicable Standards and Requirements (cont'd)

- 4. Is any portion of the proposed project within an Area of Critical Environmental Concern (ACEC)?
 a. Yes No If yes, provide name of ACEC (see instructions to WPA Form 3 or MassDEP Website for ACEC locations). **Note:** electronic filers click on Website.
 b. ACEC

- 5. Is any portion of the proposed project within an area designated as an Outstanding Resource Water (ORW) as designated in the Massachusetts Surface Water Quality Standards, 314 CMR 4.00?
 a. Yes No
- 6. Is any portion of the site subject to a Wetlands Restriction Order under the Inland Wetlands Restriction Act (M.G.L. c. 131, § 40A) or the Coastal Wetlands Restriction Act (M.G.L. c. 130, § 105)?
 a. Yes No
- 7. Is this project subject to provisions of the MassDEP Stormwater Management Standards?
 a. Yes. Attach a copy of the Stormwater Report as required by the Stormwater Management Standards per 310 CMR 10.05(6)(k)-(q) and check if:
 - 1. Applying for Low Impact Development (LID) site design credits (as described in Stormwater Management Handbook Vol. 2, Chapter 3)
 - 2. A portion of the site constitutes redevelopment
 - 3. Proprietary BMPs are included in the Stormwater Management System.
 b. No. Check why the project is exempt:
 - 1. Single-family house
 - 2. Emergency road repair
 - 3. Small Residential Subdivision (less than or equal to 4 single-family houses or less than or equal to 4 units in multi-family housing project) with no discharge to Critical Areas.

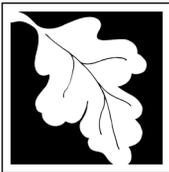

D. Additional Information

- This is a proposal for an Ecological Restoration Limited Project. Skip Section D and complete Appendix A: Ecological Restoration Notice of Intent – Minimum Required Documents (310 CMR 10.12).

Applicants must include the following with this Notice of Intent (NOI). See instructions for details.

Online Users: Attach the document transaction number (provided on your receipt page) for any of the following information you submit to the Department.

- 1. USGS or other map of the area (along with a narrative description, if necessary) containing sufficient information for the Conservation Commission and the Department to locate the site. (Electronic filers may omit this item.)
- 2. Plans identifying the location of proposed activities (including activities proposed to serve as a Bordering Vegetated Wetland [BVW] replication area or other mitigating measure) relative to the boundaries of each affected resource area.

3/25/24

2. Date

3. Signature of Property Owner (if different)

[Signature]

4. Date

5/21/24

5. Signature of Representative (if any)

6. Date

For Conservation Commission:

Two copies of the completed Notice of Intent (Form 3), including supporting plans and documents, two copies of the NOI Wetland Fee Transmittal Form, and the city/town fee payment, to the Conservation Commission by certified mail or hand delivery.

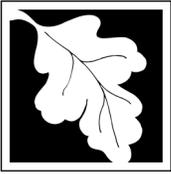

For MassDEP:

One copy of the completed Notice of Intent (Form 3), including supporting plans and documents, one copy of the NOI Wetland Fee Transmittal Form, and a copy of the state fee payment to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery.

Other:

If the applicant has checked the "yes" box in any part of Section C, Item 3, above, refer to that section and the Instructions for additional submittal requirements.

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

B. Fees

Fee should be calculated using the following process & worksheet. **Please see Instructions before filling out worksheet.**

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

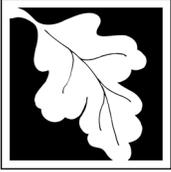

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Step 1/Type of Activity	Step 2/Number of Activities	Step 3/Individual Activity Fee	Step 4/Subtotal Activity Fee
Exempt			Exempt

Step 5/Total Project Fee: _____

Step 6/Fee Payments:

Total Project Fee:	<u>Exempt</u>
	a. Total Fee from Step 5
State share of filing Fee:	<u>Exempt</u>
	b. 1/2 Total Fee less \$12.50
City/Town share of filing Fee:	<u>Exempt</u>
	c. 1/2 Total Fee plus \$12.50

C. Submittal Requirements

- a.) Complete pages 1 and 2 and send with a check or money order for the state share of the fee, payable to the Commonwealth of Massachusetts.

Department of Environmental Protection
 Box 4062
 Boston, MA 02211

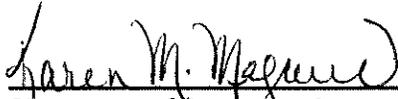

- b.) **To the Conservation Commission:** Send the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and the city/town fee payment.

To MassDEP Regional Office (see Instructions): Send a copy of the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and a **copy** of the state fee payment. (E-filers of Notices of Intent may submit these electronically.)

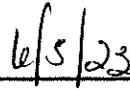

Town of Franklin Conservation Commission

PROPERTY ACCESS SIGNATURE FORM

I hereby request that the Franklin Conservation Commission review this NOI/RDA/ANRAD application. I (we) grant authority to the Franklin Conservation Commission members and agents to go onto my (our) property solely for purposes directly related to the inspection and approval of this application and for follow-up compliance with the permit conditions.

Signature of Property Owner

Date

Town of Franklin Conservation Commission

APPLICATION PROCESS SIGNATURE FORM

There are three different applications that can be submitted to undertake work in a jurisdictional area: a Notice of Intent (NOI), a Request for Determination (RDA) and a Minor Buffer Zone Activity (MBZA). All three applications have different criteria for submission and approval and the NOI and RDA are governed by both the state law and the local bylaw. The MBZA is issued under the local bylaw only.

When a potential applicant requests advice from the Conservation Agent on which application to file, the opinion of the Agent is based on the information given by the potential applicant and any other information available to the Agent, e.g. the town's GIS system. The Agent has no legal right to go onto private property at any time until after an application is filed or permission of the property owner is given.

It is important that all applicants understand that after an application is filed, additional information may come to light e.g. via a field inspection or a review of the application, that may impact the scope of the submitted application and the approval process. **Therefore, it is the ultimate responsibility of the applicant to decide which application to file.**

In light of the above, please sign below indicating an understanding of this policy and submit it with the application.

Signature of Property Owner

1.6. Commercial/Industrial

Base Fee		\$600.00	_____
Infrastructure in Buffer Zone or Resource Area			
Roads	___ linear feet x \$2.00	=	_____
*Drainage Structures	___ X \$10.00 each	=	_____
Wetland Resource Area Disturbed	___ square feet x \$0.50	=	_____
Buildings	___ X \$125 each	=	_____
All Accessory Improvements	\$100.00	=	_____

2. REQUEST FOR DETERMINATION (RDA) \$100.00

3. MINOR BUFFER ZONE ACTIVITY (MBZA) \$50.00

4. ABBREVIATED NOTICE OF RESOURCE AREA DETERMINATION (ANRAD)

\$0.50/foot/resource area: = _____

5. OTHER PERMITS/SERVICES

Order of Conditions Extension	\$50.00	_____
Certificate of Compliance Request	\$50.00	_____
Certificate Re-Inspection	\$50.00	_____
Status Letter for Financial Institution	\$100.00	_____
Permit Amendment	\$100.00	_____

6. FILING FEE CALCULATION

Town Share of State Fees (See NOI Wetland Fee Transmittal Form) \$ EXEMPT

Local Filing Fee Calculated Above \$ EXEMPT

TOTAL Due Town of Franklin (Check No.1) \$ EXEMPT

State Share of Filing Fee (See NOI Wetland Fee Transmittal Form)

TOTAL Due DEP (Check No. 2) \$ EXEMPT

7. ADVERTISING FEE (Check No. 3) TBD

The fee will be the exact amount the newspaper charges for that specific advertisement. Once the advertisement is placed with the paper, by the Conservation Commission, the applicant will be notified of the cost and will be

expected to submit a check for that exact amount, payable to the Town of Franklin, to the Conservation Department prior to the first hearing.

*Drainage structures: catch basins, manholes, leaching basins, gutter inlet or any other man-made structure (other than a pipe) for purposes of controlling drainage.

Checklist for Stormwater Report

A. Introduction

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

A Stormwater Report must be submitted with the Notice of Intent permit application to document compliance with the Stormwater Management Standards. The following checklist is NOT a substitute for the Stormwater Report (which should provide more substantive and detailed information) but is offered here as a tool to help the applicant organize their Stormwater Management documentation for their Report and for the reviewer to assess this information in a consistent format. As noted in the Checklist, the Stormwater Report must contain the engineering computations and supporting information set forth in Volume 3 of the [Massachusetts Stormwater Handbook](#). The Stormwater Report must be prepared and certified by a Registered Professional Engineer (RPE) licensed in the Commonwealth.

The Stormwater Report must include:

- The Stormwater Checklist completed and stamped by a Registered Professional Engineer (see page 2) that certifies that the Stormwater Report contains all required submittals.¹ This Checklist is to be used as the cover for the completed Stormwater Report.
- Applicant/Project Name
- Project Address
- Name of Firm and Registered Professional Engineer that prepared the Report
- Long-Term Pollution Prevention Plan required by Standards 4-6
- Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan required by Standard 8²
- Operation and Maintenance Plan required by Standard 9

In addition to all plans and supporting information, the Stormwater Report must include a brief narrative describing stormwater management practices, including environmentally sensitive site design and LID techniques, along with a diagram depicting runoff through the proposed BMP treatment train. Plans are required to show existing and proposed conditions, identify all wetland resource areas, NRCS soil types, critical areas, Land Uses with Higher Potential Pollutant Loads (LUHPPL), and any areas on the site where infiltration rate is greater than 2.4 inches per hour. The Plans shall identify the drainage areas for both existing and proposed conditions at a scale that enables verification of supporting calculations.

As noted in the Checklist, the Stormwater Management Report shall document compliance with each of the Stormwater Management Standards as provided in the Massachusetts Stormwater Handbook. The soils evaluation and calculations shall be done using the methodologies set forth in Volume 3 of the Massachusetts Stormwater Handbook.

To ensure that the Stormwater Report is complete, applicants are required to fill in the Stormwater Report Checklist by checking the box to indicate that the specified information has been included in the Stormwater Report. If any of the information specified in the checklist has not been submitted, the applicant must provide an explanation. The completed Stormwater Report Checklist and Certification must be submitted with the Stormwater Report.

¹ The Stormwater Report may also include the Illicit Discharge Compliance Statement required by Standard 10. If not included in the Stormwater Report, the Illicit Discharge Compliance Statement must be submitted prior to the discharge of stormwater runoff to the post-construction best management practices.

² For some complex projects, it may not be possible to include the Construction Period Erosion and Sedimentation Control Plan in the Stormwater Report. In that event, the issuing authority has the discretion to issue an Order of Conditions that approves the project and includes a condition requiring the proponent to submit the Construction Period Erosion and Sedimentation Control Plan before commencing any land disturbance activity on the site.

Checklist for Stormwater Report

B. Stormwater Checklist and Certification

The following checklist is intended to serve as a guide for applicants as to the elements that ordinarily need to be addressed in a complete Stormwater Report. The checklist is also intended to provide conservation commissions and other reviewing authorities with a summary of the components necessary for a comprehensive Stormwater Report that addresses the ten Stormwater Standards.

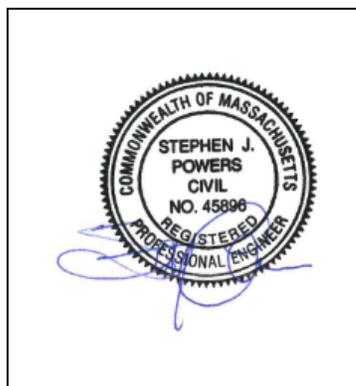

Note: Because stormwater requirements vary from project to project, it is possible that a complete Stormwater Report may not include information on some of the subjects specified in the Checklist. If it is determined that a specific item does not apply to the project under review, please note that the item is not applicable (N.A.) and provide the reasons for that determination.

A complete checklist must include the Certification set forth below signed by the Registered Professional Engineer who prepared the Stormwater Report.

Registered Professional Engineer's Certification

I have reviewed the Stormwater Report, including the soil evaluation, computations, Long-term Pollution Prevention Plan, the Construction Period Erosion and Sedimentation Control Plan (if included), the Long-term Post-Construction Operation and Maintenance Plan, the Illicit Discharge Compliance Statement (if included) and the plans showing the stormwater management system, and have determined that they have been prepared in accordance with the requirements of the Stormwater Management Standards as further elaborated by the Massachusetts Stormwater Handbook. I have also determined that the information presented in the Stormwater Checklist is accurate and that the information presented in the Stormwater Report accurately reflects conditions at the site as of the date of this permit application.

Registered Professional Engineer Block and Signature

Signature and Date

Checklist

Project Type: Is the application for new development, redevelopment, or a mix of new and redevelopment?

- New development
- Redevelopment
- Mix of New Development and Redevelopment

Checklist for Stormwater Report

Checklist (continued)

LID Measures: Stormwater Standards require LID measures to be considered. Document what environmentally sensitive design and LID Techniques were considered during the planning and design of the project:

- No disturbance to any Wetland Resource Areas
- Site Design Practices (e.g. clustered development, reduced frontage setbacks)
- Reduced Impervious Area (Redevelopment Only)
- Minimizing disturbance to existing trees and shrubs
- LID Site Design Credit Requested:
 - Credit 1
 - Credit 2
 - Credit 3
- Use of “country drainage” versus curb and gutter conveyance and pipe
- Bioretention Cells (includes Rain Gardens)
- Constructed Stormwater Wetlands (includes Gravel Wetlands designs)
- Treebox Filter
- Water Quality Swale
- Grass Channel
- Green Roof
- Other (describe): _____

Standard 1: No New Untreated Discharges

- No new untreated discharges
- Outlets have been designed so there is no erosion or scour to wetlands and waters of the Commonwealth
- Supporting calculations specified in Volume 3 of the Massachusetts Stormwater Handbook included.

Checklist for Stormwater Report

Checklist (continued)

Standard 2: Peak Rate Attenuation

- Standard 2 waiver requested because the project is located in land subject to coastal storm flowage and stormwater discharge is to a wetland subject to coastal flooding.
- Evaluation provided to determine whether off-site flooding increases during the 100-year 24-hour storm.
- Calculations provided to show that post-development peak discharge rates do not exceed pre-development rates for the 2-year and 10-year 24-hour storms. If evaluation shows that off-site flooding increases during the 100-year 24-hour storm, calculations are also provided to show that post-development peak discharge rates do not exceed pre-development rates for the 100-year 24-hour storm.

Standard 3: Recharge

- Soil Analysis provided.
- Required Recharge Volume calculation provided.
- Required Recharge volume reduced through use of the LID site Design Credits.
- Sizing the infiltration, BMPs is based on the following method: Check the method used.
 - Static
 - Simple Dynamic
 - Dynamic Field¹
- Runoff from all impervious areas at the site discharging to the infiltration BMP.
- Runoff from all impervious areas at the site is *not* discharging to the infiltration BMP and calculations are provided showing that the drainage area contributing runoff to the infiltration BMPs is sufficient to generate the required recharge volume.
- Recharge BMPs have been sized to infiltrate the Required Recharge Volume.
- Recharge BMPs have been sized to infiltrate the Required Recharge Volume *only* to the maximum extent practicable for the following reason:
 - Site is comprised solely of C and D soils and/or bedrock at the land surface
 - M.G.L. c. 21E sites pursuant to 310 CMR 40.0000
 - Solid Waste Landfill pursuant to 310 CMR 19.000
 - Project is otherwise subject to Stormwater Management Standards only to the maximum extent practicable.
- Calculations showing that the infiltration BMPs will drain in 72 hours are provided.
- Property includes a M.G.L. c. 21E site or a solid waste landfill and a mounding analysis is included.

¹ 80% TSS removal is required prior to discharge to infiltration BMP if Dynamic Field method is used.

Checklist for Stormwater Report

Checklist (continued)

Standard 3: Recharge (continued)

- The infiltration BMP is used to attenuate peak flows during storms greater than or equal to the 10-year 24-hour storm and separation to seasonal high groundwater is less than 4 feet and a mounding analysis is provided.
- Documentation is provided showing that infiltration BMPs do not adversely impact nearby wetland resource areas.

Standard 4: Water Quality

The Long-Term Pollution Prevention Plan typically includes the following:

- Good housekeeping practices;
 - Provisions for storing materials and waste products inside or under cover;
 - Vehicle washing controls;
 - Requirements for routine inspections and maintenance of stormwater BMPs;
 - Spill prevention and response plans;
 - Provisions for maintenance of lawns, gardens, and other landscaped areas;
 - Requirements for storage and use of fertilizers, herbicides, and pesticides;
 - Pet waste management provisions;
 - Provisions for operation and management of septic systems;
 - Provisions for solid waste management;
 - Snow disposal and plowing plans relative to Wetland Resource Areas;
 - Winter Road Salt and/or Sand Use and Storage restrictions;
 - Street sweeping schedules;
 - Provisions for prevention of illicit discharges to the stormwater management system;
 - Documentation that Stormwater BMPs are designed to provide for shutdown and containment in the event of a spill or discharges to or near critical areas or from LUHPPL;
 - Training for staff or personnel involved with implementing Long-Term Pollution Prevention Plan;
 - List of Emergency contacts for implementing Long-Term Pollution Prevention Plan.
- A Long-Term Pollution Prevention Plan is attached to Stormwater Report and is included as an attachment to the Wetlands Notice of Intent.
 - Treatment BMPs subject to the 44% TSS removal pretreatment requirement and the one inch rule for calculating the water quality volume are included, and discharge:
 - is within the Zone II or Interim Wellhead Protection Area
 - is near or to other critical areas
 - is within soils with a rapid infiltration rate (greater than 2.4 inches per hour)
 - involves runoff from land uses with higher potential pollutant loads.
 - The Required Water Quality Volume is reduced through use of the LID site Design Credits.
 - Calculations documenting that the treatment train meets the 80% TSS removal requirement and, if applicable, the 44% TSS removal pretreatment requirement, are provided.

Checklist for Stormwater Report

Checklist (continued)

Standard 4: Water Quality (continued)

- The BMP is sized (and calculations provided) based on:
 - The ½" or 1" Water Quality Volume or
 - The equivalent flow rate associated with the Water Quality Volume and documentation is provided showing that the BMP treats the required water quality volume.
- The applicant proposes to use proprietary BMPs, and documentation supporting use of proprietary BMP and proposed TSS removal rate is provided. This documentation may be in the form of the propriety BMP checklist found in Volume 2, Chapter 4 of the Massachusetts Stormwater Handbook and submitting copies of the TARP Report, STEP Report, and/or other third party studies verifying performance of the proprietary BMPs.
- A TMDL exists that indicates a need to reduce pollutants other than TSS and documentation showing that the BMPs selected are consistent with the TMDL is provided.

Standard 5: Land Uses With Higher Potential Pollutant Loads (LUHPPLs)

- The NPDES Multi-Sector General Permit covers the land use and the Stormwater Pollution Prevention Plan (SWPPP) has been included with the Stormwater Report.
- The NPDES Multi-Sector General Permit covers the land use and the SWPPP will be submitted **prior to** the discharge of stormwater to the post-construction stormwater BMPs.
- The NPDES Multi-Sector General Permit does **not** cover the land use.
- LUHPPLs are located at the site and industry specific source control and pollution prevention measures have been proposed to reduce or eliminate the exposure of LUHPPLs to rain, snow, snow melt and runoff, and been included in the long term Pollution Prevention Plan.
- All exposure has been eliminated.
- All exposure has **not** been eliminated and all BMPs selected are on MassDEP LUHPPL list.
- The LUHPPL has the potential to generate runoff with moderate to higher concentrations of oil and grease (e.g. all parking lots with >1000 vehicle trips per day) and the treatment train includes an oil grit separator, a filtering bioretention area, a sand filter or equivalent.

Standard 6: Critical Areas

- The discharge is near or to a critical area and the treatment train includes only BMPs that MassDEP has approved for stormwater discharges to or near that particular class of critical area.
- Critical areas and BMPs are identified in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 7: Redevelopments and Other Projects Subject to the Standards only to the maximum extent practicable

- The project is subject to the Stormwater Management Standards only to the maximum Extent Practicable as a:
 - Limited Project
 - Small Residential Projects: 5-9 single family houses or 5-9 units in a multi-family development provided there is no discharge that may potentially affect a critical area.
 - Small Residential Projects: 2-4 single family houses or 2-4 units in a multi-family development with a discharge to a critical area
 - Marina and/or boatyard provided the hull painting, service and maintenance areas are protected from exposure to rain, snow, snow melt and runoff
 - Bike Path and/or Foot Path
 - Redevelopment Project
 - Redevelopment portion of mix of new and redevelopment.
- Certain standards are not fully met (Standard No. 1, 8, 9, and 10 must always be fully met) and an explanation of why these standards are not met is contained in the Stormwater Report.
- The project involves redevelopment and a description of all measures that have been taken to improve existing conditions is provided in the Stormwater Report. The redevelopment checklist found in Volume 2 Chapter 3 of the Massachusetts Stormwater Handbook may be used to document that the proposed stormwater management system (a) complies with Standards 2, 3 and the pretreatment and structural BMP requirements of Standards 4-6 to the maximum extent practicable and (b) improves existing conditions.

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control

A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan must include the following information:

- Narrative;
 - Construction Period Operation and Maintenance Plan;
 - Names of Persons or Entity Responsible for Plan Compliance;
 - Construction Period Pollution Prevention Measures;
 - Erosion and Sedimentation Control Plan Drawings;
 - Detail drawings and specifications for erosion control BMPs, including sizing calculations;
 - Vegetation Planning;
 - Site Development Plan;
 - Construction Sequencing Plan;
 - Sequencing of Erosion and Sedimentation Controls;
 - Operation and Maintenance of Erosion and Sedimentation Controls;
 - Inspection Schedule;
 - Maintenance Schedule;
 - Inspection and Maintenance Log Form.
- A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan containing the information set forth above has been included in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control (continued)

- The project is highly complex and information is included in the Stormwater Report that explains why it is not possible to submit the Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan with the application. A Construction Period Pollution Prevention and Erosion and Sedimentation Control has **not** been included in the Stormwater Report but will be submitted **before** land disturbance begins.
- The project is **not** covered by a NPDES Construction General Permit.
- The project is covered by a NPDES Construction General Permit and a copy of the SWPPP is in the Stormwater Report.
- The project is covered by a NPDES Construction General Permit but no SWPPP been submitted. The SWPPP will be submitted BEFORE land disturbance begins.

Standard 9: Operation and Maintenance Plan

- The Post Construction Operation and Maintenance Plan is included in the Stormwater Report and includes the following information:
 - Name of the stormwater management system owners;
 - Party responsible for operation and maintenance;
 - Schedule for implementation of routine and non-routine maintenance tasks;
 - Plan showing the location of all stormwater BMPs maintenance access areas;
 - Description and delineation of public safety features;
 - Estimated operation and maintenance budget; and
 - Operation and Maintenance Log Form.
- The responsible party is **not** the owner of the parcel where the BMP is located and the Stormwater Report includes the following submissions:
 - A copy of the legal instrument (deed, homeowner's association, utility trust or other legal entity) that establishes the terms of and legal responsibility for the operation and maintenance of the project site stormwater BMPs;
 - A plan and easement deed that allows site access for the legal entity to operate and maintain BMP functions.

Standard 10: Prohibition of Illicit Discharges

- The Long-Term Pollution Prevention Plan includes measures to prevent illicit discharges;
- An Illicit Discharge Compliance Statement is attached;
- NO Illicit Discharge Compliance Statement is attached but will be submitted **prior to** the discharge of any stormwater to post-construction BMPs.

Town of Franklin Conservation Commission

NOTIFICATION TO ABUTTERS

Under the Massachusetts Wetlands Protection Act And The Franklin Wetlands Protection Bylaw

In accordance with the second paragraph of Massachusetts General Laws Chapter 131, Section 40, you are hereby notified of the following proposed project:

Stephen Powers has filed a Notice of Intent with the Franklin Conservation Commission for the Tri-County Regional Vocational Technical High School on 147 Pond St, Franklin, MA 02038, under the Wetlands Protection Act (M.G.L c.131 §40).

Copies of the Notice of Intent may be examined during regular office hours at 20 A Street, Framingham, MA 01701-4102

Copies may also be examined by contacting the Franklin Conservation Department located at 355 East Central Street, Franklin, MA, (508) 520-4929.

Notice of the public hearing including the date, time, and place will be published at least five (5) days in advance in the Milford Daily News.

Notice of the public hearing including the date, time, and place will be posted in the Franklin Town Hall at least forty-eight (48) hours in advance of the public hearing.

The public hearing will be held on Thursday, April 18, 2024, at 7:00 pm, via Zoom, and can be accessed through the Conservation Commission agenda for that night, which will be posted on the Town's website 48 hours prior to the meeting. Please call the Conservation Department at (508) 520-4929 if you have any questions.

You may also contact the Massachusetts Department of Environmental Protection, Central Regional Office, Worcester, MA at (508) 792-7650.

E. Signatures

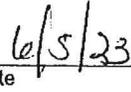

I certify under the penalties of perjury that the foregoing Abbreviated Notice of Resource Area Delineation and accompanying plans, documents, and supporting data are true and complete to the best of my knowledge. I understand that the Conservation Commission will place notification of this Notice in a local newspaper at the expense of the applicant in accordance with the wetlands regulations, 310 CMR 10.05(5)(a).

I further certify under penalties of perjury that all abutters were notified of this application, pursuant to the requirements of M.G.L. c. 131, § 40. Notice must be made in writing by hand delivery or certified mail (return receipt requested) to all abutters within 100 feet of the property line of the project location.

I hereby grant permission, to the Agent or member of the Conservation Commission and the Department of Environmental Protection, to enter and inspect the area subject to this Notice at reasonable hours to evaluate the wetland resource boundaries subject to this Notice, and to require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.

I acknowledge that failure to comply with these certification requirements is grounds for the Conservation Commission or the Department to take enforcement action.

1. Signature of Applicant

2. Date

3. Signature of Property Owner (if different)

4. Date

5. Signature of Representative (if any)

6. Date

For Conservation Commission:

Two copies of the completed Abbreviated Notice of Resource Area Delineation (Form 4A), including supporting plans and documents; two copies of the ANRAD Wetland Fee Transmittal Form; and the city/town fee payment must be sent to the Conservation Commission by certified mail or hand delivery.

For MassDEP:

One copy of the completed Abbreviated Notice of Resource Area Delineation (Form 4A), including supporting plans and documents; one copy of the ANRAD Wetland Fee Transmittal Form; and a copy of the state fee payment must be sent to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery. (E-filers may submit these electronically.)

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

Bureau of Resource Protection - Wetlands
ANRAD Wetland Fee Transmittal Form
Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

C. Submittal Requirements

- a.) Send a copy of this form, with a check or money order for the state share of the fee, payable to the Commonwealth of Massachusetts, to:

Department of Environmental Protection
Box 4062
Boston, MA 02211

- b.) **To the Conservation Commission:** Send the Abbreviated Notice of Resource Area Delineation; a **copy** of this form; and the city/town fee payment.
- c.) **To DEP Regional Office:** Send one copy of the Abbreviated Notice of Resource Area Delineation (and any additional documentation required as part of a Simplified Review Buffer Zone Project); a **copy** of this form; and a **copy** of the state fee payment. (E-filers of Notices of Intent may submit these electronically.)

Environmental Consulting & Restoration, LLC

WETLAND DELINEATION REPORT

TO: Samiotes
FROM: Brad Holmes @ ECR, LLC
DATE: April 7, 2023
RE: Tri County Regional Vocational Technical High School, Franklin

Per your request, Environmental Consulting & Restoration, LLC (ECR) performed a wetland delineation on March 23, 2023 at the Tri County Regional Vocational Technical High School in Franklin (the site). The purpose of the delineation was to identify the landward limits of the wetland resource areas on and near the site. The site consists of a high school with typical appurtenances including paved roadways, parking, athletic fields, recreational areas as well as a solar field. The weather on March 23rd was sunny, clear and cold (approximately 45 degrees) with light wind and dry site conditions. The weather was suitable for a wetland delineation, there was no snow cover or frozen ground conditions.

Wetland Delineation

ECR located the landward limits of several Bordering (BVW) and Isolated Vegetated Wetlands (IVW) located through the site. The wetland is part of a larger wetland system located off site to the north and east. The wetlands are part of multiple systems located within various portions of the site. Some of the wetlands are isolated lowlands while others are associated with intermittent flow and stormwater collection. Wetland flags (pink & black striped ribbon) were placed at the landward limits of the wetlands as follows:

BVW A1 to A30
BVW B1 to B40
IVW C1 to C12
BVW D1 to D17
BVW F1 to F25
IVW G1 to G13

The "A" through "D" wetlands are located to the southwest of the school and the "G" and "F" wetlands are located within the northwestern portion of the site. Please note, ECR observed several non-jurisdictional ditches located along the solar array and the roadways through the site. These ditches appear to manage stormwater throughout the site, but are not associated with any jurisdictional wetlands.

Wetland Delineation Methodology

The BVWs and IVWs were delineated following the methodology established by the Massachusetts Department of Environmental Protection (DEP) regulations found at 310 CMR 10.55 pertaining to the delineation of Bordering Vegetated Wetlands. The delineation was performed by analyzing vegetation, hydrology within 12 inches of the surface, and soil conditions within 20 inches of the surface. The vegetated wetlands contain hydric soils, saturated soils, and dominant wetland indicator plants. One transect with two examination plots (yellow numbered plastic ribbons) was conducted in order to verify the accuracy of this wetland delineation (please refer to the DEP BVW Field Data Sheets attached).

ECR

Environmental Consulting & Restoration, LLC

As a result of ECR's field work and review of available environmental databases, ECR is able to confirm that the site contains the following wetland resource areas and areas of Conservation Commission jurisdiction:

- Bordering Vegetated Wetlands
- Isolated Vegetated Wetlands
- 100-foot buffer zone to BVW & IVW

Also, a review of the MassMapper database reveals the following:

- The site is not located within Estimated/Priority Habitat for Rare Species according to the Massachusetts Natural Heritage & Endangered Species Program (MaNHESP).
- The site does not contain Certified Vernal Pools according to the MaNHESP.
- The site does not contain U.S.G.S. mapped stream/river.
- The site is not located within an Area of Critical Environmental Concern.

Manager

Environmental Consulting & Restoration, LLC

WETLAND DELINEATION REPORT UPDATE

TO: Samiotes Consulting, Inc.
FROM: Brad Holmes @ ECR, LLC
DATE: March 4, 2024
RE: Tri County Regional Vocational Technical High School, Franklin

Please include this Wetland Delineation Report Update to Environmental Consulting & Restoration, LLC's (ECR) April 7, 2023 Wetland Delineation Report for delineation activities at the Tri County Regional Vocational Technical High School in Franklin (the site). ECR performed additional wetland delineation activities on and near the solar field portion of the site on February 1, 2024. ECR delineated the limits of stormwater basins in the northwest and southwest portions of the solar field, which is located to the east of the school building and parking lot. ECR delineated these basins as Isolated Vegetated Wetlands that may be jurisdictional under the Town of Franklin Wetland Bylaw. The ditches under the solar panels were not delineated during the February 1st review but have been located by the survey crew and are also potential Isolated Vegetated Wetlands that may be jurisdictional to the Town of Franklin Wetland Bylaw. These areas are not wetland resource areas as defined in the Massachusetts Wetlands Protection Act or its associated Regulations found at 310 CMR 10.00.

During the February 1st review, ECR placed flags to mark the limit of these stormwater basins as follows:

- Southwest Stormwater Basin – ECR flags Swale #1 to #6, connect #6 to Basin #1. Basin #1 runs to Basin #9. Connect Basin #9 to Swale #106 end at Swale #100.
- Northwest Stormwater Basin – ECR flags #200 to #219.

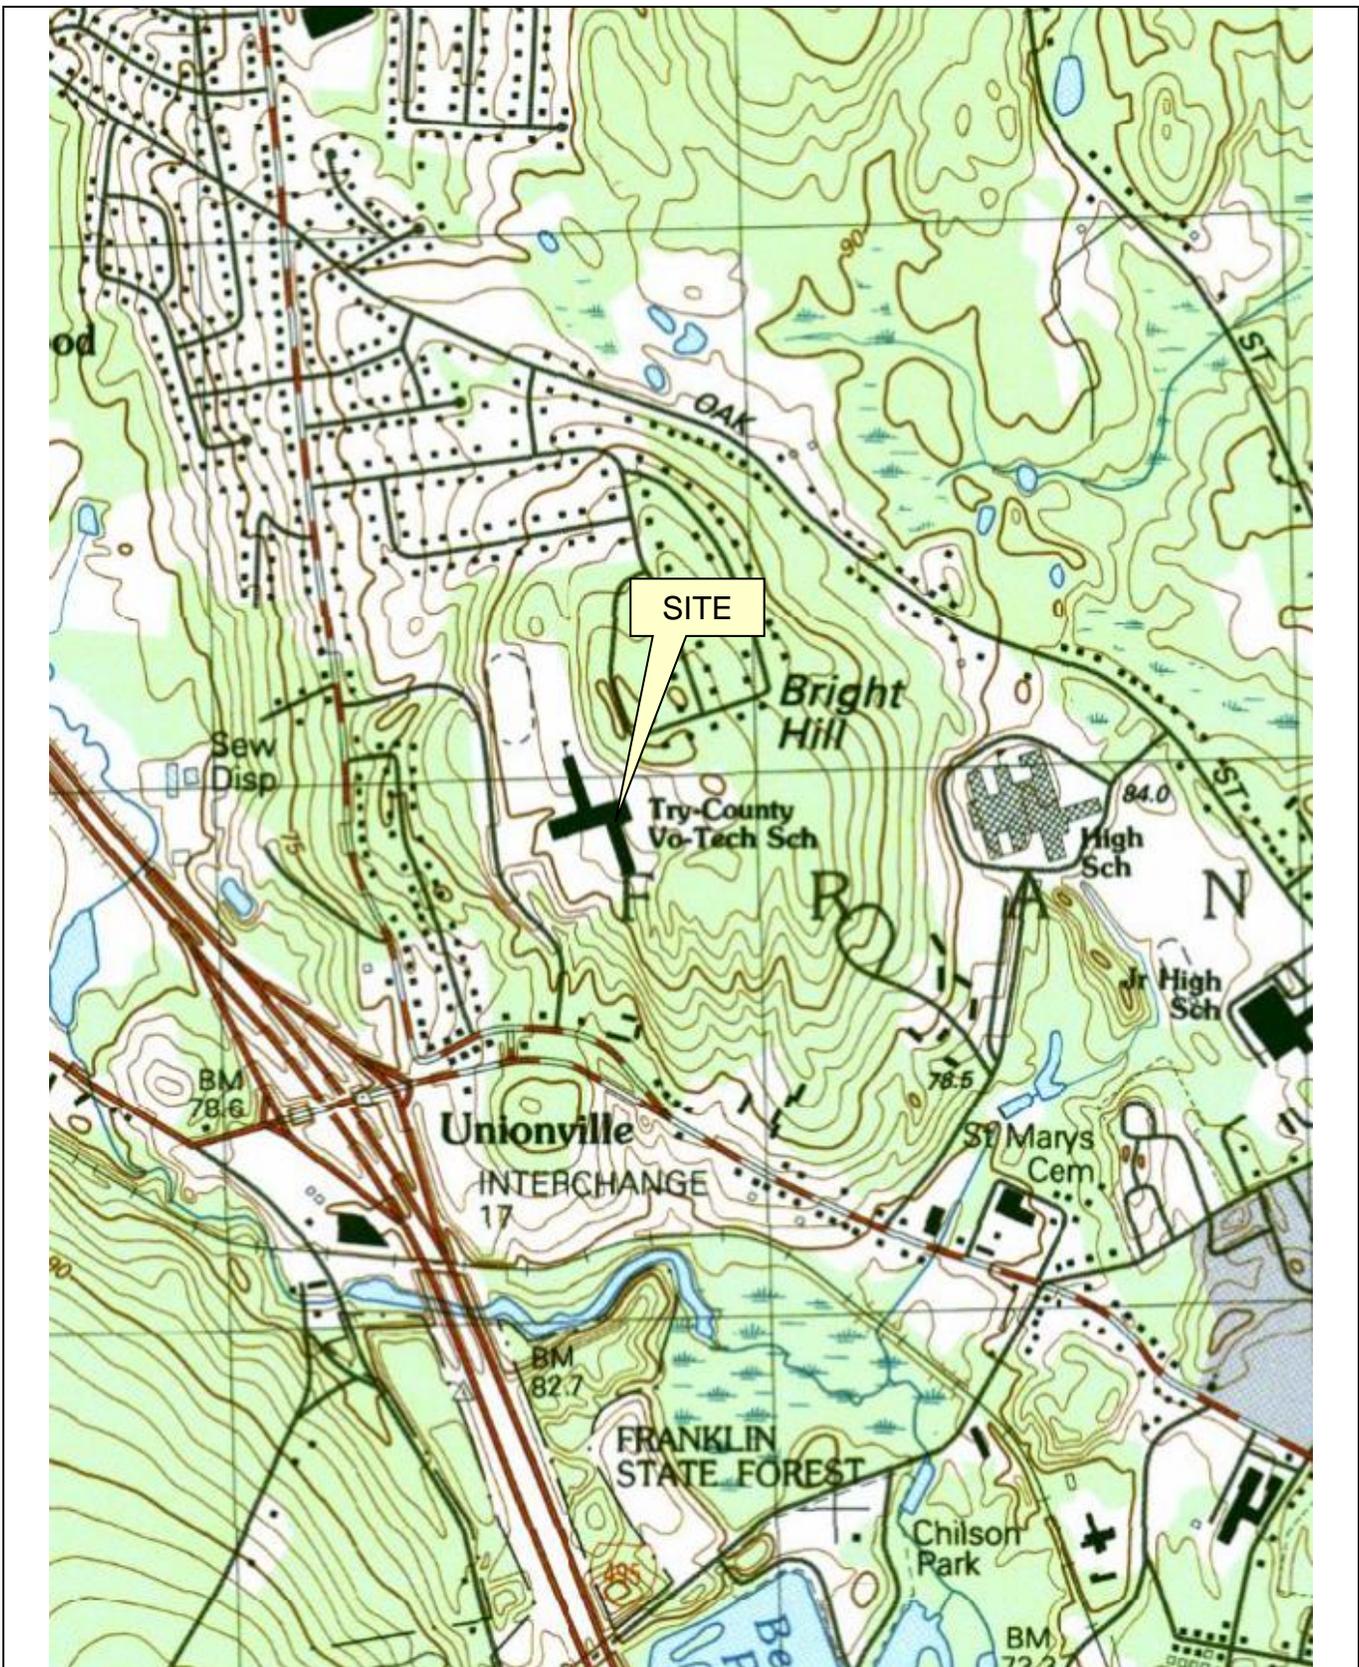

Upon review of this wetland delineation report update, please contact me at (617) 529 – 3792 or Brad@ecrwetlands.com with any questions or requests for additional information.

Sincerely yours,
Environmental Consulting & Restoration, LLC

Brad Holmes

Applicant: Prepared by: Brad Holmes, Environmental Consulting & Restoration, LLC Project Location: Tri County Regional Voc Franklin, MA

Check all that apply:

- Vegetation alone presumed adequate to delineate BVW boundary: fill out Section I only
- Vegetation and other indications of hydrology used to delineate BVW boundary: fill out sections I and II
- Method other than dominance test used (attach additional information)

Section I. Vegetation			Transect A	Plot 1	Date: 3/23/23		
A. Sample Layer and Plant Species			B. Basal Area (or percent cover)		C. Percent Dominance	D. Dominant Plant	Wetland Indicator Status
Trees	Black Birch	<i>Betula lenta</i>	16,10,5,6=	323.7	37.3%	Yes	FACU-
	Black Oak	<i>Quercus valentina</i>	26=	496.6	57.2%	Yes	FACU
	White Oak	<i>Quercus alba</i>	5,6=	48.3	5.6%	No	FACU
			Total =	868.6			
Saplings	Black Birch	<i>Betula lenta</i>	30.0%		85.7%	Yes	FACU-
	American Beech	<i>Fagus grandifolia</i>	5.0%		14.3%	No	FACU
Shrubs	Witch Hazel	<i>Hamamelis virginiana</i>	10.0%		100.0%	Yes	FAC-
Herbaceous	None						
Vines	None						

* Use an asterisk to mark wetland indicator plants: plant species listed in the Wetlands Protection Act (MGL c. 131, s. 40); plants in the genus Sphagnum; plants listed as FAC, FAC+, FACW-, FACW, FACW+, or OBL; or plants with physiological or morphological adaptations. If any plants are identified as wetland indicator plants due to physiological or morphological adaptations, describe the adaptation next to the asterisk.

** Use to identify plants that are acting as Hydrophytes (buttress roots, adventitious buds, etc.)

Vegetation Conclusion

Number of dominant wetland indicator plants: 0 Number of dominant non-wetland indicator plants: 4

Is the number of dominant wetland plants equal to or greater than the number of dominant non-wetland plants? Yes

If vegetation alone is presumed adequate to delineate the BVW boundary, submit this form with the Request for Determination of Applicability or Notice of Intent.

Section II. Indicators of Hydrology					Other Indicators of Hydrology (check all that apply)	
Hydric Soil Interpretation					Site inundated? No	
1. Soil Survey					Depth to free water in observation hole: None	
Is there a published soil survey for this site? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No					Depth to soil saturation in observation hole: 12"	
title/date: http://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx					Water lines: Yes	
map number: Mass Mapper					Drift Marks: No	
soil type map: Upland land, Montauk, Hollis & Charlton					Sediment Deposits: Yes	
hydric soil inclusions: No					Drainage Patterns in BVW: Yes	
Are field observations consistent with soil survey? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No					Oxidized Rhizospheres: No	
Remarks:					Water Stained Leaves: Yes	
2. Soil Description					Recorded data (stream, tidal gauge; aerial photo; other)	
Horizon	Depth	Matrix	Texture	Redoximorphic Features	Other: Plot is in wetland below wetland flag #A1	
O	0-4"	10YR2/1	Organic		Evidence of flooding	
A	4"-14"	10YR3/1		Redox.	Number of wetland plants > than number of non-wetland plants? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
B	14"-20"	10YR4/1		Redox.	Wetland hydrology present:	
					hydric soil <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
					other indicators <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

Applicant:

Prepared by: Brad Holmes, Environmental Consulting & Restoration, LLC

Project Location:

Tri County Regional Voc
Franklin, MA

Check all that apply:

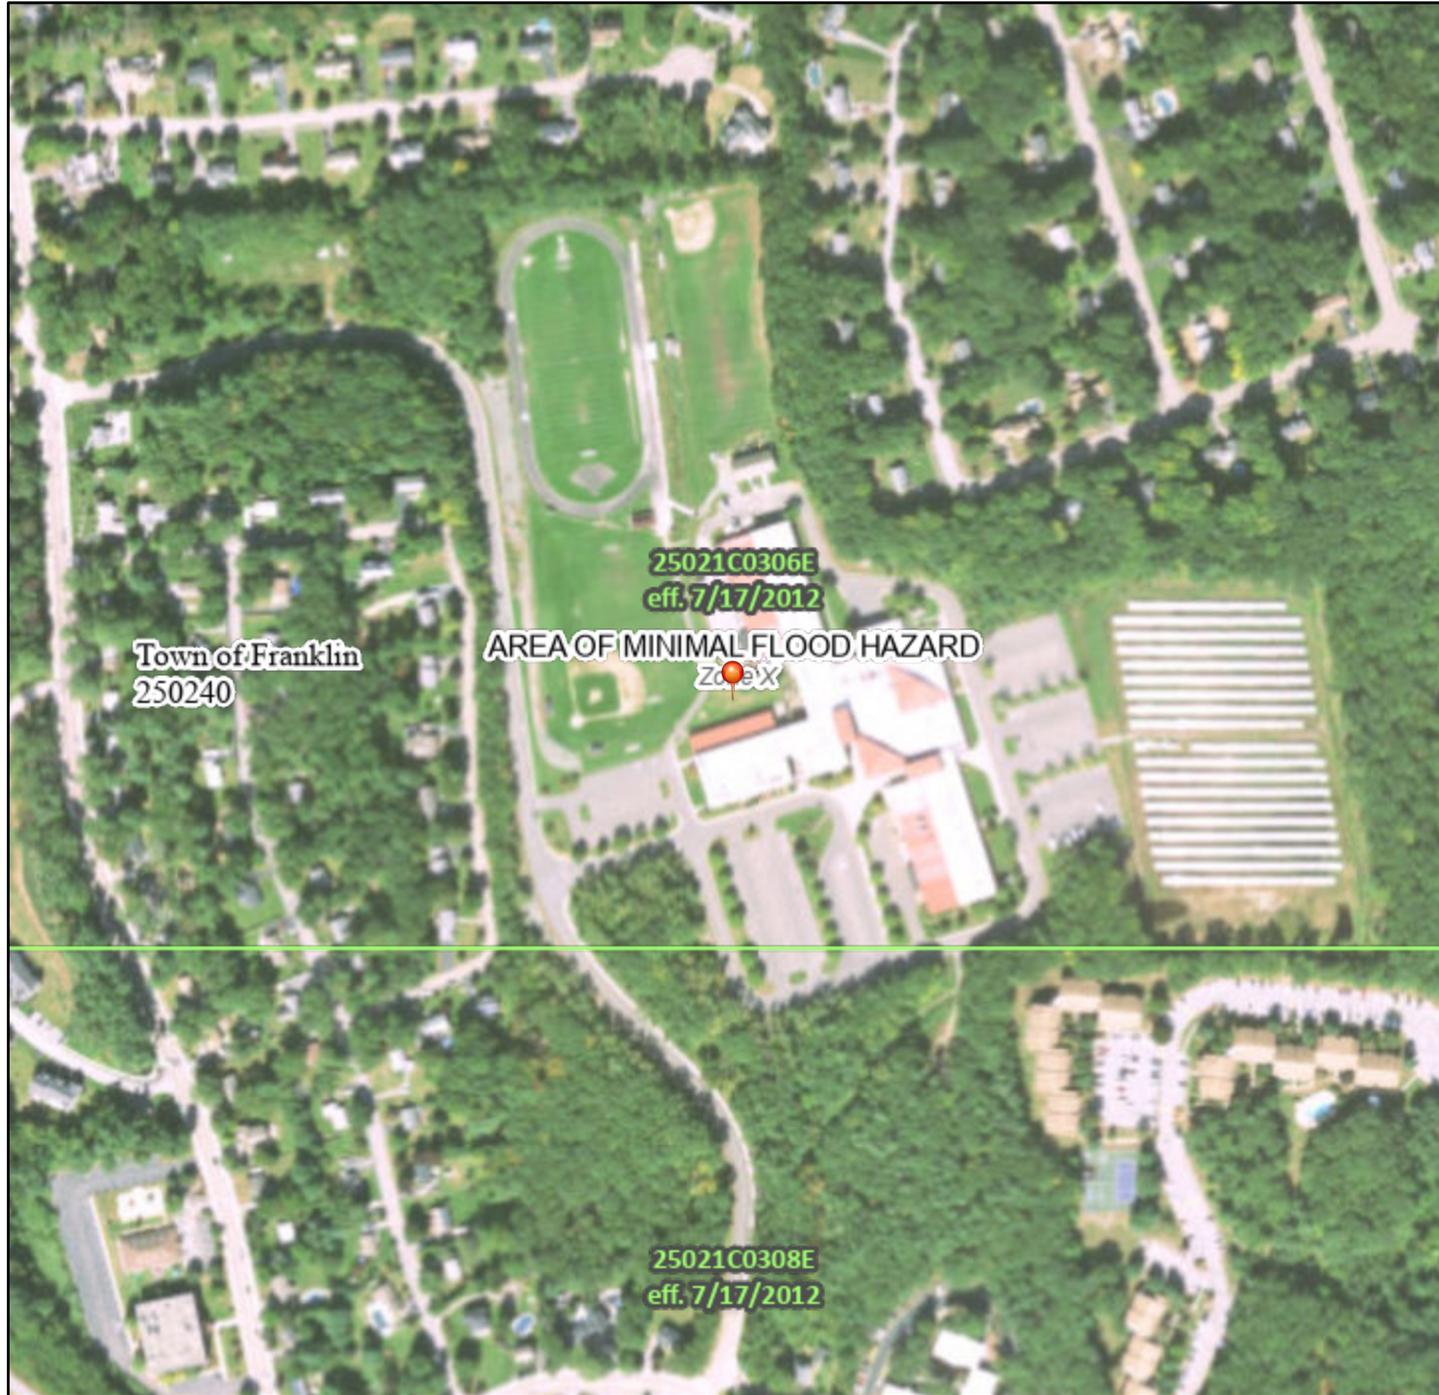

- Vegetation alone presumed adequate to delineate BVW boundary: fill out Section I only
- Vegetation and other indications of hydrology used to delineate BVW boundary: fill out sections I and II
- Method other than dominance test used (attach additional information)

Section I. Vegetation		Transect A	Plot 2	Date: 3/23/23		
A. Sample Layer and Plant Species			B. Basal Area (or percent cover)	C. Percent Dominance	D. Dominant Plant	Wetland Indicator Status
Trees	Black Oak	<i>Quercus valentina</i>	22,12,30,16= 1395.8	56.3%	Yes	FACU
	White Pine	<i>Pinus strobus</i>	34,12= 926.7	37.4%	Yes	FACU
	Swamp Tupelo	<i>Nyssa sylvatica</i>	5,5= 39.2	1.6%	No	FACW+
	Norway Maple	<i>Acer platanoides</i>	6= 28.7	1.2%	No	UPL
	Black Birch	<i>Betula lenta</i>	5,5= 39.2	1.6%	No	FACU-
	Shagbark Hickory	<i>Carya ovata</i>	5,6= 48.3	1.9%	No	FACU
				Total = 2477.9		
Saplings	White Pine	<i>Pinus strobus</i>	10.0%	50.0%	Yes	FACU
	Shagbark Hickory	<i>Carya ovata</i>	10.0%	50.0%	Yes	FACU
Shrubs	Witch Hazel	<i>Hamamelis virginiana</i>	15.0%	100.0%	Yes	FAC-
Herbaceous	Pennsylvania Sedge	<i>Carex pensylvanica</i>	20.0%	100.0%	Yes	FAC
Vines	Bittersweet	<i>Celastrus scandens</i>	10.0%	100.0%	Yes	FACU-
** Use to identify plants that are acting as Hydrophytes (buttress roots, adventitious buds, etc.)						
Vegetation Conclusion						
Number of dominant wetland indicator plants: 1			Number of dominant non-wetland indicator plants: 6			
Is the number of dominant wetland plants equal to or greater than the number of dominant non-wetland plants? No						
If vegetation alone is presumed adequate to delineate the BVW boundary, submit this form with the Request for Determination of Applicability or Notice of Intent.						
Section II. Indicators of Hydrology				Other Indicators of Hydrology (check all that apply)		
Hydric Soil Interpretation				Site inundated? No		
1. Soil Survey				Depth to free water in observation hole: None		
Is there a published soil survey for this site? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No				Depth to soil saturation in observation hole: None

		The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

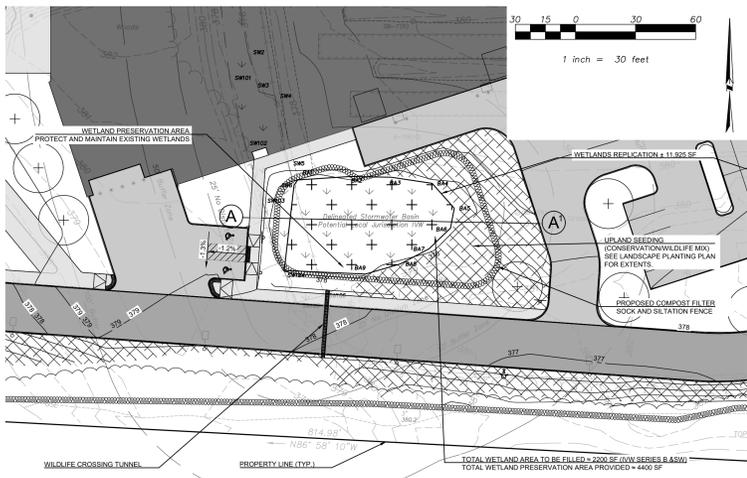

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

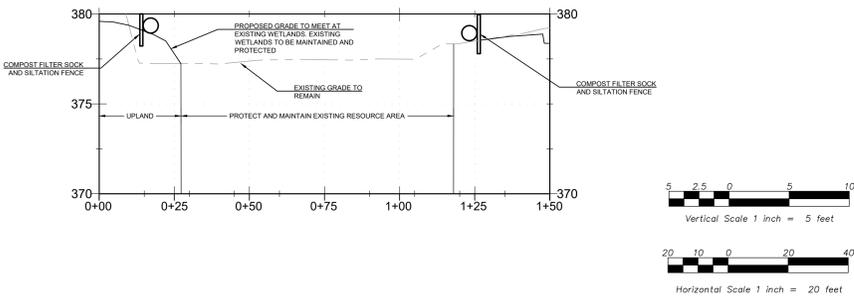

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 3/12/2024 at 4:28 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

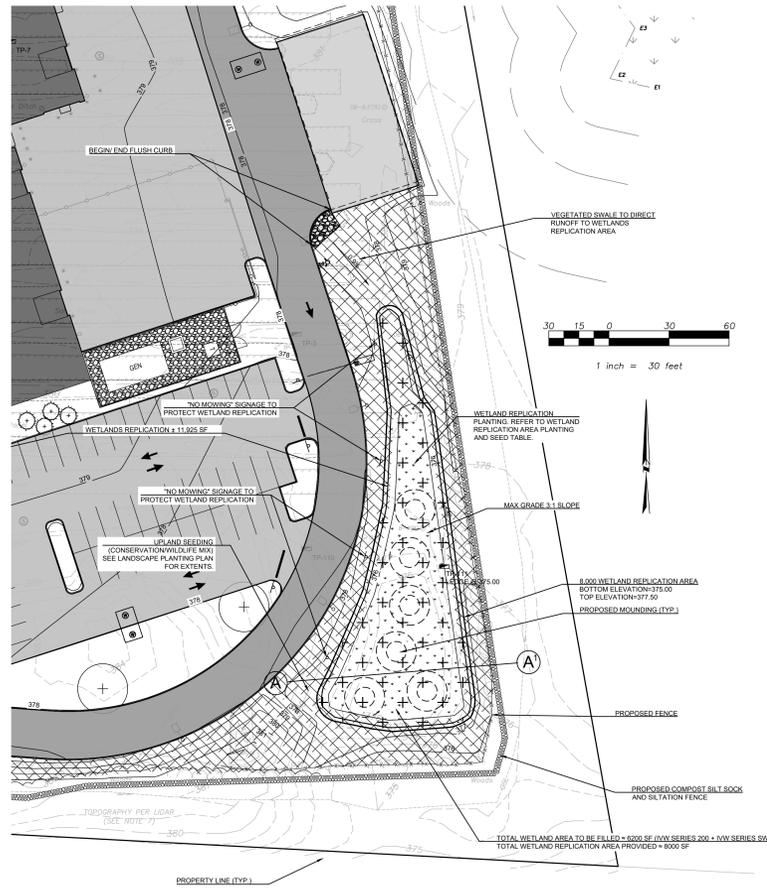

**APPENDIX 3:
SKETCHES**

1 WETLAND PRESERVATION AREA #1

1 WETLAND PRESERVATION AREA #1 SECTION A-A1

2 WETLAND REPLICATION AREA #2

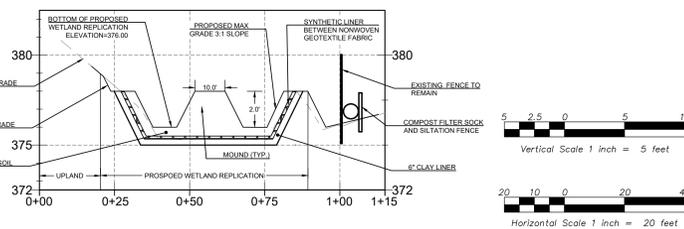

3 SILT FENCE WITH COMPOST FILTER SOCK

4 COMPOST FILTER SOCK

Plant Name	Plant Height	Plant Quantity	Wetland Indicator Status	Planting Notes
Black Chokeberry (<i>Aronia pyrifolia</i>)	36-48"	10	FAC	A medium-sized shrub (6-10') with small white to pinkish flowers in the spring. Persistent red berries are eaten by wildlife in winter. Very soil adaptable. Plant in upland fringe bordering Wetland Replication Area and upland areas disturbed by construction access.
Sweet Pepperbush (<i>Clethra alnifolia</i>)	36-48"	7	FAC+	A medium-sized shrub found in coastal and inland wetlands. Provides food and cover for birds. Tolerates drier sites. Plant on mounds and along fringe of Wetland Replication Area.
Northern Arrowwood (<i>Viburnum dentatum</i>)	36-48"	7	FACW-	A medium-sized shrub (6-12') common in shrub swamps and forested wetlands. Tolerates partial shade and various soil moisture. Plant on mounds and slopes of Wetland Replication Area.
Buttonbush (<i>Cephaelanthus occidentalis</i>)	36-48"	7	OBL	Medium-sized shrub, white globular-shaped flowers in summer. Prefers soils flooded or saturated for long periods or fluctuating hydrology. Nutlets are foods for ducks and other birds. Plant in depressions of Wetland Replication Area.
Winterberry (<i>Ilex verticillata</i>)	36-48"	7	FACW+	Medium to tall shrub found in a variety of wetlands. Shade to full sun. Bright red berries persist into winter and are important wildlife food. Plant on slopes of mounds in Wetland Replication Area.
TOTAL		38		
Ernst OBL-FACW Perennial Food and Cover Wetland Mix™ (or approved equivalent)	20 lbs/acre	3.5 lbs	Varied	This wetland restoration and mitigation mix contains common native species to create a permanent grass and forb cover. Seed from October-May in full sun or partially shaded areas in rich, wet, saturated soils; tolerates standing water during the dormant season and part of the growing season. Source: Ernst Seeds https://www.ernstseeds.com/products/obl-facw-perennial-food-cover-wetland-mix/ Plant in Wetland Replication Area.
New England Wetland Plants New England Conservation / Wildlife Mix	25 lbs/acre	4.5 lbs	Varied	The New England Conservation/Wildlife Mix provides a permanent cover of grasses, wildflowers, and legumes. For both good erosion control and wildlife habitat value. The mix is designed to be a no-maintenance seeding, and is appropriate for cut and fill slopes, detention basin side slopes, and disturbed areas adjacent to commercial and residential projects. https://newenglandseeds.com/newengland-wildlife-mix/ Plant along upland slopes of Wetland Replication Area and restored access areas.

NOTE: SHRUBS SHALL BE PLANTED ON THE TOP OF THE MOUNDS WITH 30-36" SPACING O.C.

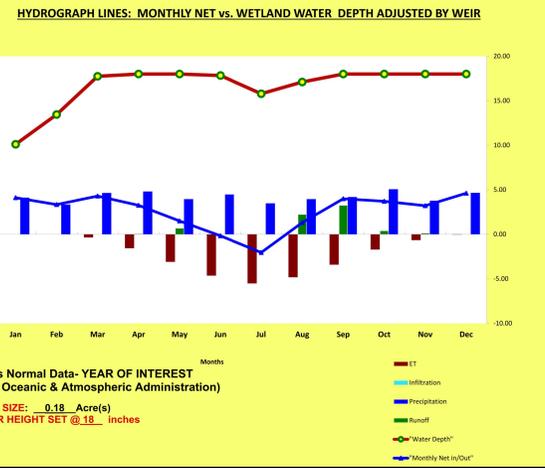

5 WETLAND REPLICATION AREA PLANTING AND SEED TABLE

2 WETLAND REPLICATION AREA #2 SECTION A-A1

ISOLATED VEGETATED WETLAND HABITAT CREATION NOTES
AN ISOLATED VEGETATED WETLAND HABITAT (WETLAND REPLICATION AREA) CONSTRUCTION SEQUENCE AND MONITORING PROTOCOL SHALL BE IMPLEMENTED AS FOLLOWS (WHERE DEVIATIONS BETWEEN THESE NOTES OR THE WETLAND REPLICATION AREA DESIGN DRAWINGS AND THE ORDER OF CONDITIONS, THE ORDER OF CONDITIONS SHALL CONTROL)

- PURPOSE**
- THE PURPOSE OF THE WETLAND REPLICATION AREA IS TO MITIGATE UNAVOIDABLE IMPACTS ASSOCIATED WITH THE FILLING OF THE LOCAL JURISDICTIONAL RESOURCE AREA LOCATED TOWARDS THE NORTH AND SOUTH OF THE PROJECT BUILDING SITE. THE WETLAND REPLICATION AREA SHALL BE CONSTRUCTED AT AN APPROXIMATELY 2:1 RATIO, RESULTING IN ABOUT 8,000 SF OF NEW WETLANDS. THE WETLAND REPLICATION AREA SHALL BE CONSTRUCTED IN A MANNER SUCH THAT IT PROVIDES ENHANCED WETLAND FUNCTIONS AND VALUES RELATIVE TO THE WETLAND THAT IS BEING FILLED, INCLUDING THE CREATION OF IMPORTANT WILDLIFE HABITAT FEATURES FOR POTENTIAL VERNAL POOL INDICATOR SPECIES. AN IMPORTANT CONSIDERATION TOWARDS THE CREATION OF VERNAL POOL HABITAT IS THAT IT BE SUFFICIENTLY WET DURING THE SPRING BREEDING PERIOD (TYP. MARCH THROUGH JUNE) TO ALLOW FOR THE METAMORPHOSIS OF CERTAIN FACULTATIVE AND OBLIGATE VERNAL POOL INDICATOR SPECIES, INCLUDING BUT NOT LIMITED TO WOOD FROG (*LITHOBATES SYLVATICUS*) AND SPOTTED SALAMANDER (*AMBYSTOMA MACULATUM*), AMONG OTHER SPECIES.
- CONSTRUCTION OVERSIGHT BY QUALIFIED PERSONNEL**
- THE CONSTRUCTION OF THE WETLAND REPLICATION AREA, INCLUDING FINE GRADING, SOILS PLACEMENT, LINER INSTALLATION, AND PLANTINGS, SHALL BE DONE UNDER THE DIRECT SUPERVISION OF A QUALIFIED WETLAND SCIENTIST (WVS) HIRED BY THE APPLICANT. THE WVS SHALL BE ON SITE TO MONITOR CONSTRUCTION OF THE WETLAND REPLICATION AREA TO ENSURE COMPLIANCE WITH THE MITIGATION PLAN AND TO ADJUST WHEN NEEDED TO MEET WETLAND CONSTRUCTION FIELD ADJUSTMENTS TO SUB-GRADES, FINAL GRADES, MICRO-TOPOGRAPHY, SEDIMENT CONTROLS, PLACEMENT OF WOODY DEBRIS AND OTHER WILDLIFE HABITAT FEATURES, AND PLANTINGS (BOTH SPECIES AND PLACEMENT, DEPENDING ON NURSERY AVAILABILITY) BASED ON SITE SPECIFIC CONDITIONS AT THE TIME OF CONSTRUCTION.
 - AT LEAST 14 DAYS PRIOR TO THE START OF CONSTRUCTION AND THE PRE-CONSTRUCTION KICK-OFF MEETING, THE APPLICANT SHALL PROVIDE TO THE COMMISSION FOR REVIEW AND APPROVAL THE WRITTEN QUALIFICATIONS, DEMONSTRATED PROJECT EXPERIENCE, AND CREDENTIALS OF THE DESIGNATED WVS THAT WILL BE OVERSEEING CONSTRUCTION OF THE WETLAND REPLICATION AREA.
- REESTABLISHED WETLAND FLAGGING AND SEDIMENT CONTROLS**
- PROJECT SURVEYORS, IF NECESSARY, SHALL RE-ESTABLISH AND RE-LABEL WETLAND FLAGS AS PER THE RECORD DRAWINGS USING WOODEN STAKES INSTALLED WITHIN 100-FEET OF THE WETLAND REPLICATION AREA. PROJECT SURVEYORS SHALL ALSO STAKE OUT THE LIMITS OF THE PROPOSED WETLAND REPLICATION AREA. THE STAKES SHALL REMAIN IN PLACE UNTIL WETLAND VEGETATION HAS BECOME FULLY ESTABLISHED. THIS SURVEY AND STAKING WORK SHALL OCCUR PRIOR TO CONSTRUCTION OF THE WETLAND REPLICATION AREA.
 - PRIOR TO CONSTRUCTION, 12-INCH DIAMETER COMPOST FILTER TUBES AND SILT FENCE SHALL BE INSTALLED AS PER MANUFACTURER SPECIFICATIONS ALONG THE DOWN GRADIENT EDGE OF THE WETLAND REPLICATION AREA TO PROTECT DOWN GRADIENT BORDERING VEGETATED WETLANDS (AS SHOWN ON THE RECORD DRAWINGS). THE BALANCE OF THE PERIMETER OF THE WETLAND REPLICATION AREA SHALL BE ENCLOSED WITH THE SAME SEDIMENT CONTROL MEASURES AFTER THE GRADING AND PLANTING WORK IS COMPLETE.
- REFERENCE WETLANDS**
- LOCATING THE WETLAND REPLICATION AREA NEAR THE OTHER SIMILAR RESOURCE AREA, AS DEPICTED ON THE RECORD DRAWINGS (SEE REFERENCE WETLANDS I/VW SERIES 200 AND I/VW SERIES B & SW), INCREASES THE POTENTIAL FOR A GREATER VARIETY AND NUMBER OF VERTEBRATE AND INVERTEBRATE SPECIES TO USE THE NEW WETLAND AREA. THESE NEARBY WETLANDS MAY PROVIDE A SOURCE OF AMPHIBIANS, REPTILES, INSECTS, AND PLANTS THAT CAN READILY COLONIZE A NEW VEGETATED WETLAND.
- SYNTHETIC LINER INSTALLATION TECHNIQUE**
- IN ORDER TO SUPPLEMENT GROUNDWATER AND TIGHTER ON-SITE SOILS NEAR THE SURFACE OF THE WETLAND REPLICATION AREA SITE TO CREATE THE DESIRED HYDROLOGIC CONDITIONS, THE WETLAND SHALL BE CONSTRUCTED USING A COMBINATION CLAY AND SYNTHETIC LINER TECHNIQUE (CREATING A PERFECTED WETLAND CONDITION). THE SYNTHETIC LINER SHALL BE AN APPROVED COMMERCIAL FISH GRADE / AQUATIC SAFE, NON-TOXIC LINER, WELDED AT THE FACTORY (I.E., FACTORY SEALED) AND CUT TO THE SPECIFIED SIZE. LINERS MADE OF EPDM (ETHYLENE PROPYLENE MONOMER) THAT IS 45 MILLIMETERS THICK OR RPE (REINFORCED POLYETHYLENE) THAT IS 30 MILLIMETERS THICK ARE APPROPRIATE. THE CLAY LINER COMPONENT SHALL BE INSTALLED BENEATH THE SYNTHETIC LINER TO A UNIFORM THICKNESS OF 1-2 INCHES ON A PREPARED SUBBASE. THE CLAY LINER SHALL BE COMPACTED WITH A SHEEPS FOOT ROLLER.
 - TO PROTECT THE SYNTHETIC LINER FROM SHARP ROCKS OR STICKS, IT SHALL BE SANDWICHED BETWEEN TWO 16-OUNCE ENVIRONMENTAL GRADE GEOTEXTILE FABRIC PADS / SYNTHETIC BLANKETS (ONE-PIECE EACH, FACTORY AND THEN COVERED WITH AT LEAST 8 TO 12-INCHES OF "WETLAND SOIL" (SEE SPECIFICATIONS BELOW FOR ADDITIONAL DETAIL). AMPHIBIANS AND INSECTS MAY ALSO SEND THE WINTER ON THE BOTTOM OF THE WETLAND IN THE SOIL PLACED OVER THE LINER. THE TOP EDGES OF THE SYNTHETIC LINER AND GEOTEX TILE FILTER FABRIC PADS SHALL BE ANCHORED WITH 12-INCH LONG GALVANIZED STEEL LANDSCAPE SPIKES AND WASHERS PLACED APPROXIMATELY 18-INCHES APART AND/OR AS PER MANUFACTURER SPECIFICATIONS. THE STAKES WILL KEEP THE LINER FROM BEING PUSHED DOWN INTO THE DEPRESSION WHEN IT IS BEING COVERED WITH SOIL.
 - EXCESS LINER GEOTEX TILE MATERIAL SHALL BE CUT AND PROPERLY DISPOSED OF. THE PERIMETER OF THE INSTALLED LINER SHALL BE DELINEATED WITH WIRE FLAGS SO THAT HEAVY EXCAVATOR EQUIPMENT DOES NOT TRAVEL OVER THE LINER AND CAUSE SHEARING FROM DIFFERENTIAL COMPACTION WHEN PLACING WETLAND SOIL OR INSTALLING PLANTS ON THE PROPOSED MOUNDS.
 - THE WETLAND REPLICATION AREA'S EDGE SHOULD BE IRREGULAR, WITH GRADUAL SLOPES LEADING TO THE WETLAND'S EDGE. THESE GRADUAL SLOPES CAN BE IMPORTANT TO THE EMIGRATION OF FULLY DEVELOPED AMPHIBIAN LARVAE.
 - PRIOR TO PLACEMENT OF WETLAND SOIL, THE SITE CONTRACTOR SHALL PROVIDE THE WS WITH AN INTERIM AS-BUILT. THE INTERIM AS BUILT SHALL INCLUDE A SURFACE AREA CALCULATION CONFIRMING THAT SUFFICIENT AREA HAS BEEN PROVIDED (EXCLUDING SIDE SLOPES).
 - EXISTING WETLAND SOILS FROM THE WETLAND FILL LOCATION ARE NOT SUITABLE FOR RE-USE DUE TO THE TIMING OF EARTHWORK AND WETLANDS REPLICATION AREA CONSTRUCTION. HOWEVER, TOPSOIL EXCAVATED FROM THE WETLAND REPLICATION AREA SITE MAY BE REPURPOSED AND AMENDED WITH AN EVENLY MIXED ORGANIC MINERAL SOIL ("WETLAND SOIL") IMPORTED FROM A REPUTABLE OFF-SITE SOURCE / SUPPLIER AS APPROVED BY THE WS. THE LOCATION OF SOIL PLACED IN THE WETLAND REPLICATION AREA SHALL BE APPROXIMATELY 1-2 INCHES THROUGHOUT, BRINGING GRADES TO THE FINAL DESIRED ELEVATIONS.
 - AS NOTED ABOVE, THE PERIMETER OF THE INSTALLED LINER SHALL BE DELINEATED WITH WIRE FLAGS SO THAT HEAVY EXCAVATOR EQUIPMENT DOES NOT TRAVEL OVER THE LINER AND CAUSE SHEARING FROM DIFFERENTIAL COMPACTION WHEN PLACING WETLAND SOIL OR INSTALLING PLANTS.
 - FOLLOWING PLACEMENT OF THE WETLAND SOIL, MICRO-TOPOGRAPHY (PITS AND MOUNDS) SHALL THEN BE ESTABLISHED USING CONTINUOUS ROUGH GRADING ("ROUGH AND LOOSEN TECHNIQUE"). THE MICRO-TOPOGRAPHY WORK SHALL OCCUR BY HAND (OR A LONG ARM REACH EXCAVATOR) UNDER THE DIRECT SUPERVISION OF THE WS. THE TROUGH OF A DEPRESSION/PIT SHALL BE CONTINUOUS WITH THE CREST OF A MOUND, WHICH SHALL BE CONTINUOUS WITH THE TROUGH OF THE NEXT DEPRESSION/PIT. THE ENTIRE WETLAND REPLICATION AREA SHALL BE SOULPTED USING THE PIT-AND-MOUND METHOD WHERE THE FEATURES ARE, ON AVERAGE, 24-INCHES IN HEIGHT FROM THE TOP OF THE CREST ON THE MOUND TO THE BOTTOM OF THE TROUGH IN THE PIT. THE WIDTH OF THE CONSTRUCTED MOUNDS SHALL BE APPROXIMATELY 10 FEET (MEASURED AT THE TOP) AND SPACED APPROXIMATELY 25 TO 30 FEET ON-CENTER UNLESS OTHERWISE DIRECTED BY THE WS. ROUGHLY 50 PERCENT OF THE SURFACE AREA OF THE WETLAND REPLICATION AREA SHOULD BE MOUNDS AND 50 PERCENT SHOULD BE PITS.
- WOODY DEBRIS AND PLANTINGS**
- BE COVERED WITH A MINIMUM 2-INCH LAYER OF WEED-FREE STRAW MULCH (THE USE OF HAY MULCH IS PROHIBITED), OR, IF NOT SOUND DURING THE GROWING SEASON, BY MULCHING WITH TACKIFIERS.
 - THE WETLAND REPLICATION AREA SIDE SLOPES AND ACCESS ROUTES SHALL BE STABILIZED WITH A BIODEGRADABLE EROSION CONTROL BLANKET AND THE SLOPE SEED MIX SPECIFIED ON THE RECORD DRAWINGS.
 - THE WETLAND SEED MIX AND ADJACENT SLOPE MIX SHALL BE SOWN ACCORDING TO THE MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS. A MANUFACTURER'S CERTIFICATE OF COMPLIANCE TO THE SPECIFICATION SHALL BE PROVIDED BY THE MANUFACTURER WITH EACH SHIPMENT OF SEED AND DATE SHIPPED. NO SEED MAY BE SHOWN UNTIL THE SITE CONTRACTOR HAS SUBMITTED THE CERTIFICATES TO THE WS. WEED CONTENT AND GERMINATION OF THE SEED AND ALSO THE NET WEIGHT AND DATE SHIPPED, NO SEED MAY BE SHOWN UNTIL THE SITE CONTRACTOR HAS SUBMITTED THE CERTIFICATES TO THE WS.
 - COARSE WOODY DEBRIS CONSISTING OF LOGS AND BRANCHES SHALL BE PLACED WITHIN THE BASIN (BY HAND OR LONG ARM REACH EXCAVATOR) TO PROVIDE SHELTER FOR ANIMALS DURING THE POOL'S WET AND DRY PHASES. THE DEBRIS WILL ALSO PROVIDE A PLACE FOR SALAMANDERS TO ATTACH EGG MASSES. THE WOODY DEBRIS SHOULD COVER AT LEAST 41% OF THE SURFACES OF THE WETLAND REPLICATION AREA. LEAVES RAKED FROM THE BASIN SHALL BE SPREAD ACROSS THE BOTTOM OF THE DEPRESSION.
 - NATIVE PLANTINGS SHALL BE INSTALLED AROUND THE UPPER EDGES OF THE WETLAND REPLICATION AREA AND ON THE TOPS AND SIDES OF THE CONSTRUCTED MOUNDS WITHOUT PENETRATING THE SYNTHETIC LINER, AS PER THE APPROVED PLANTING TABLE. THE WS MAY PROPOSE SUBSTITUTIONS RELATIVE TO SPECIES, SIZE, AND QUANTITIES IF THERE IS LIMITED AVAILABILITY OF PLANT STOCK AT THE TIME OF PLANTING. ALL PLANT MATERIAL SHALL BE PURCHASED FROM A NEW ENGLAND NURSERY AND GUARANTEED BY THE SITE CONTRACTOR TO BE IN VIGOROUS GROWING CONDITION. IF THE PLANT MATERIAL IS PURCHASED FROM A NURSERY LOCATED OUTSIDE NEW ENGLAND OR FROM A LOCAL NURSERY THAT OBTAINS ITS PLANT MATERIAL FROM OUTSIDE NEW ENGLAND, THE PLANT MATERIAL MUST BE PROPERLY ACCLIMATE TO NEW ENGLAND FOR ONE FULL GROWING SEASON BEFORE PLANTING. THE WS SHALL INSPECT PLANT MATERIAL AT THE TIME OF DELIVERY TO ASSESS HEALTH AND VIGOR AND CONFIRM THAT THE QUANTITIES, SIZE, AND NATIVE SPECIES CONFORM TO THE APPROVED PLANTING PLAN, SPECIES LIST, PERMIT CONDITIONS AND RECORD DRAWINGS. THE WS SHALL HAVE THE AUTHORITY TO REJECT ANY PLANT MATERIAL THEY DETERMINE DOES NOT MEET THESE CRITERIA OR PERMIT CONDITIONS.
 - THE WS SHALL OVERSEE THE PLANTING WORK TO ENSURE CONFORMANCE WITH THESE SPECIFICATIONS. PLANTINGS SHALL BE CLUSTERED AND SPACED RANDOMLY AT THE DIRECTION OF THE SUPERVISING WS TO SIMULATE NATURAL GROWTH PATTERNS AND WHERE APPROPRIATE STRUCTURAL CONTEXT WITH OTHER PLANTINGS CAN BE MAINTAINED. THE USE OF STRAW MULCH AROUND WOODY PLANTINGS IS REQUIRED.
 - PLANT MATERIAL SHALL BE PLANTED ON THE DAY OF DELIVERY. IN THE EVENT THIS IS NOT PRACTICABLE, THE SITE CONTRACTOR SHALL PROTECT, AND WATER STOCK NOT PLANTED IN CONSULTATION WITH THE WS AND NURSERY. PLANTS SHALL NOT REMAIN UPLAND FOR LONGER THAN A 3-DAY PERIOD AFTER DELIVERY TO THE SITE. ANY PLANTS NOT INSTALLED DURING THIS 3-DAY PERIOD MAY BE REJECTED BY THE WS QUALITY AND SIZE OF PLANTS, SPREAD OF ROOTS, AND SIZE OF BALLS SHALL BE IN ACCORDANCE WITH ANSI Z60 (REV. 1980) "AMERICAN STANDARD FOR NURSERY STOCK" AS PUBLISHED BY THE AMERICAN ASSOCIATION OF NURSERYMEN, INC.
 - NO FERTILIZATION IS NECESSARY AT PLANTING TIME. IN SUBSEQUENT GROWING SEASONS, SLOW-RELEASE FERTILIZERS SUITABLE FOR SATURATED SOIL CONDITIONS MAY BE APPROPRIATE BASED ON PLANT GROWTH.
 - PLANTS SHALL NOT BE BOUND WITH WIRE OR ROP OR AT ANY TIME TO DAMAGE THE BARK OR BREAK BRANCHES. PLANTS SHALL BE HANDLED FROM THE BOTTOM OF THE BALL OR CONTAINER ONLY.
 - PLANTING OPERATIONS SHALL BE PERFORMED DURING PERIODS WITHIN THE PLAN TIME SEASON WHEN WEATHER AND SOIL CONDITIONS ARE SUITABLE AS DETERMINED BY THE SUPERVISING WS. THIS IS TYPICALLY BETWEEN APRIL 15 AND JUNE 15 AND SEPTEMBER 15 THROUGH NOVEMBER 15. PLANTS SHALL NOT BE INSTALLED IN TOPSOIL THAT IS IN A MUDDY OR FROZEN CONDITION. THE SITE CONTRACTOR SHALL BE RESPONSIBLE FOR RE-SETTING ANY PLANTS THAT BECOME DISLOADED OR UPROOTED BECAUSE OF FROST HEAVES OR OTHER ENVIRONMENTAL FACTORS DURING THE FIRST TWO GROWING SEASONS.
 - SET ALL PLANTS PLUMB AND STRAIGHT. LOCATE THE PLANT IN THE CENTER OF THE PIT.
 - DUE TO UNPREDICTABILITY OF SHORT TERM LOCAL HYDROLOGIC CONDITIONS AND THE NEED FOR ADDITIONAL CARE TO ESTABLISH NEW PLANTINGS THE SITE CONTRACTOR SHALL IRRIGATE THE PLANTINGS, AS NECESSARY, DURING THE COURSE OF THE FIRST FULL GROWING SEASON AFTER PLANTING.
 - PLANTING HOLE WIDTH SHOULD BE A MINIMUM OF THREE TIMES THE DIAMETER OF THE ROOT BALL (BUT DO NOT PENETRATE THE SYNTHETIC LINER). ROOT BALLS SHALL BE MULCHED.
 - CONTAINER PLANTS SHOULD BE PLANTED AT THE SAME DEPTH AS GROWN IN THE CONTAINER.
- POST CONSTRUCTION COMPLIANCE MONITORING**
- FOLLOWING THE INITIAL PLANTING OF THE WETLAND REPLICATION AREA, THE WS SHALL DOCUMENT IN WRITING TO THE COMMISSION THAT THE AREA HAS BEEN CONSTRUCTED IN SUBSTANTIAL COMPLIANCE WITH THE APPROVED RECORD DRAWINGS. SUCH DOCUMENTATION SHALL BE ACCOMPANIED BY A FINAL, STAMPED AS-BUILT PLAN PROVIDED BY PROJECT SURVEYORS. THE AS-BUILT PLAN SHALL DEPICT THE LOCATIONS OF INSTALLED PLANTINGS, FINAL GRADE CONTOURS (1-FOOT SPACING), AND PRESENTATION OF THE WETLAND REPLICATION AREA IN PLAN-VIEW AND A MINIMUM OF TWO SECTION VIEWS, AND THE OVERALL LIMITS OF GRADING. THE AS-BUILT SHALL INCLUDE A SURFACE AREA CALCULATION CONFIRMING THAT SUFFICIENT AREA HAS BEEN PROVIDED (EXCLUDING SIDE SLOPES), AS PER THE ORDER OF CONDITIONS. LOCATIONS OF CROSS-SECTIONS SHOULD BE INDICATED ON THE PLAN VIEW. THE WS REPORT TO THE COMMISSION SHALL INCLUDE REPRESENTATIVE SITE PHOTOGRAPHS OF THE WETLAND REPLICATION AREA, A DISCUSSION OF HYDROLOGIC CONDITIONS, NUMBER AND TYPES OF PLANTS AND SEED INSTALLED IN THE REPLICATION AREA AND RECEIPTS FROM THE PLANT NURSERY AND WETLAND SOIL SOURCE (PROVIDED BY THE SITE CONTRACTOR), AND A DISCUSSION OF ANY FIELD MODIFICATIONS DEEMED NECESSARY BY THE YES TO MEET THE PROJECT PURPOSE AND GOALS.
 - FOLLOWING CONSTRUCTION, THE WETLAND REPLICATION AREA WILL BE MONITORED BY A QUALIFIED WS FOR FIVE (5) FULL GROWING SEASONS. FOR MONITORING PURPOSES, A GROWING SEASON IS DEFINED HEREIN AS THE TIME PERIOD BETWEEN MARCH 1 AND OCTOBER 31 IN ANY GIVEN YEAR, DEPENDING UPON WEATHER CONDITIONS. DURING YEARS 1 AND 2, THE WS WILL CONDUCT MONTHLY INSPECTIONS BETWEEN MARCH AND JUNE TO DETERMINE IF THE WETLAND POOL INDICATOR SPECIES ARE USING THE NEWLY CONSTRUCTED WETLAND, FOLLOWED BY A FINAL INSPECTION IN OCTOBER. DURING YEARS 3 THROUGH 5, THE WS SHALL CONDUCT INSPECTIONS IN THE SPRING AND FALL AN ANNUAL REPORT SUBMITTED NO LATER THAN DECEMBER 1ST FOLLOWING EACH MONITORING PERIOD. DURING EACH MONITORING EVENT, THE WS WILL TALLY AND INSPECT THE HEALTH AND VIGOR OF THE WETLAND MITIGATION PLANTINGS, ASSESS THE GERMINATION OF THE WETLAND SEED MIX, AND DOCUMENT ANY OBSERVED WILDLIFE ACTIVITY (INCLUDING VERNAL POOL ACTIVITY). ANY PLANT MATERIAL THAT HAS FAILED TO ESTABLISH ITSELF AND HAS IMPAIRED THE RESTORATION AREA FROM PROVIDING THE NECESSARY PLANT SPECIES FUNCTIONS SHALL BE REPLACED IN KIND OR SUBSTITUTED FOR A SPECIES THAT IS ESTABLISHING MORE SUCCESSFULLY IN THE MITIGATION AREA (AS RECOMMENDED BY THE WS).
 - THE SEDIMENT CONTROL BARRIERS SHALL BE DISASSEMBLED AND PROPERLY DISPOSED OF BY THE SITE CONTRACTOR AFTER THE REPLICATION AREA IS DEEMED STABLE BY THE WS. SEDIMENT COLLECTED BY THESE DEVICES SHALL BE REMOVED AND DISPOSED OF IN A MANNER THAT PREVENTS EROSION AND TRANSPORT TO A WATERWAY OR WETLAND.

ACO. creating
the future of drainage

ACO Climate Stilt Tunnel

For use in crossings installed flush with the surface.

The ACO Climate Stilt Tunnel with slotted upper surface is installed flush with ground level, in areas which only require Load Class C 250. The units can be installed with or without the slotted climate plate, and can connect to ACO Climate tunnels.

The benefits for amphibians and small animals are easily explained: installation flush with the road surface permits minimum crossing distances, uncomplicated entrance areas at road verge level, optimum climatic conditions due to the ingress of water and air and, at the same time, optimum adaptation of tunnel temperature to ambient conditions.

Benefits

- Compatibility with climate tunnels and entrances
- Slotted top regulates moisture and temperature
- Tunnel material unaffected by water flooding
- Crossing lengths reduced due to shallow installation
- Minimal coefficients of expansion permit precise installation without expansion joints

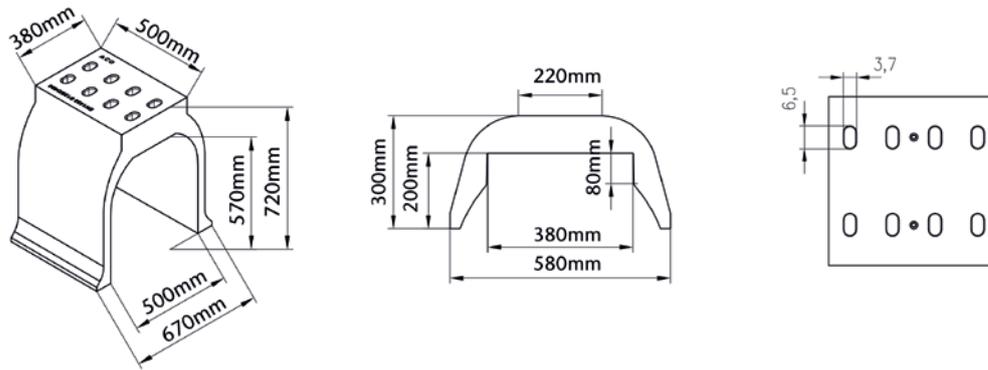

ACO Climate Stilt Tunnel

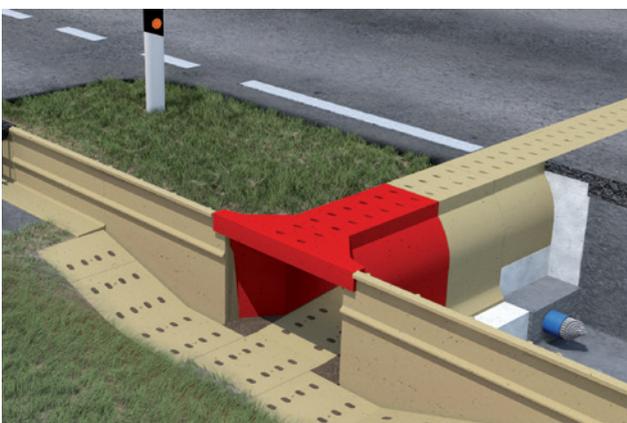

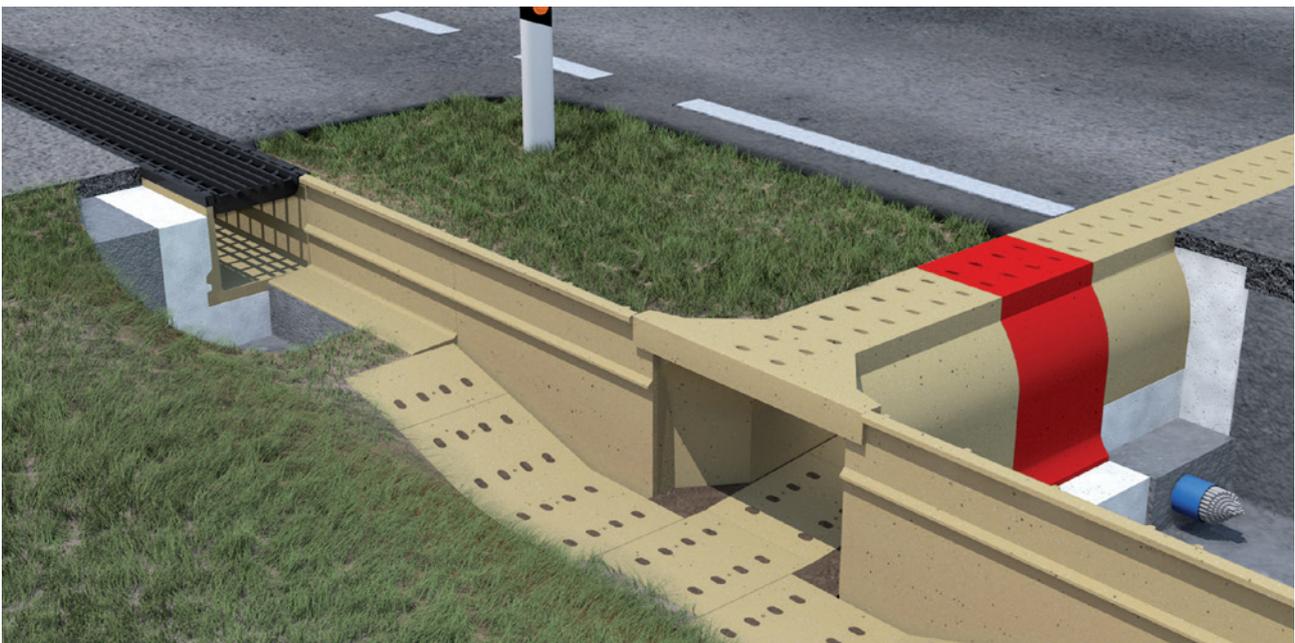

Applications

- Migratory paths across road systems
- Tunnels across paths, verges and areas of light traffic vehicles

System Overview

Product Code	Description	Length [mm]	Width [mm]	Height [mm]	Weight [kg]
ACO Climate Stilt Tunnel					
11131	Climate stilt tunnel slotted	500	580	720	129.0
11132	Climate stilt tunnel plus plate*	-	-	-	-
11129	Climate tunnel stepdown	50	580	300	6.9
11127	Climate plate with drain holes	480	480	30	16.0

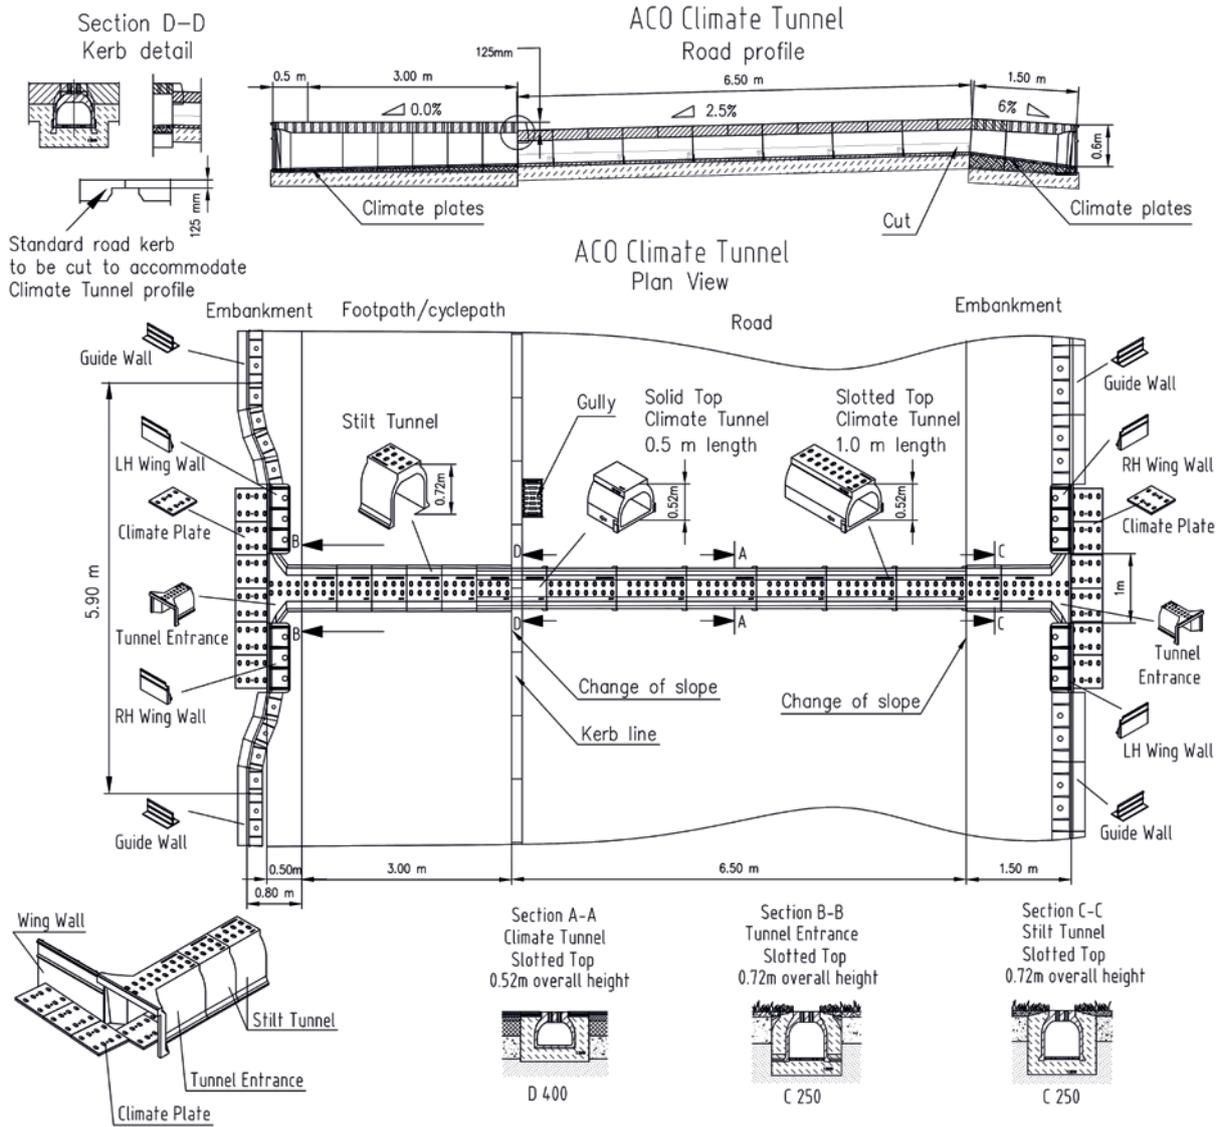

Compatibility

ACO Climate Stilt tunnels with slotted tops can be incorporated into tunnel crossing systems. Connecting directly to the tunnel entrance in verges, or as a entire tunnel in areas of light traffic (Load Class C 250). The range of Climate tunnels include solid and slotted top tunnels and tunnel entrances.

The versatility of the system allows the tunnels to be installed at surface height and transitioning between roads, pedestrian areas and verges.

This crossing installation is an indicative example and should be adapted to meet site specific conditions.

The inner height of the Tunnel Entrance and Stilt Tunnel is variable from 50mm to 70mm.

Protection of amphibians

Smooth, non-absorbent surfaces with minimal thermal conductivity form an ideal contact area for amphibians. ACO Climate Stilt Tunnels are manufactured without using metal reinforcement, eliminating the possibility of disorientation to animals arising from distortion of magnetic fields.

Optimally designed slotted openings at surface level permit the ingress of rainwater, thus not only serving the moisture needs particularly of younger amphibians, but also creating a thermal effect, helping the crossing temperature to approximate closely to ambient temperatures.

The airflow in crossings often presents problems in closed systems due to "central dryness" inside the tunnel. The slots in the ACO Climate Stilt Tunnel form numerous air-inlet openings so that airflow is minimised and vital moisture is retained. Surveys have shown that this system is effective in use.

Tips on laying tunnels

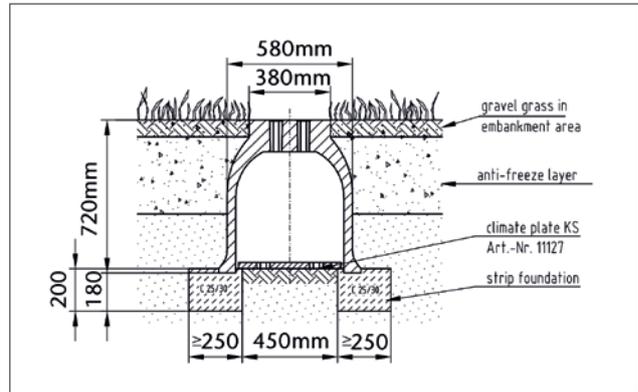

The top surface of the tunnel sits flush with the upper surface. Bevelled cutting of tunnel elements (by the customer or on site) is required to suit changes in gradient within the length of the tunnel.

Stilt tunnels are often laid so that they extend outside the road surface into the verge areas, connecting to ACO Climate tunnel with D 400 Load Class for carriageway areas. ACO Climate Stilt Tunnel elements are installed flush with the tunnel and at the same level at both ends. These are installed in the course of concreting work.

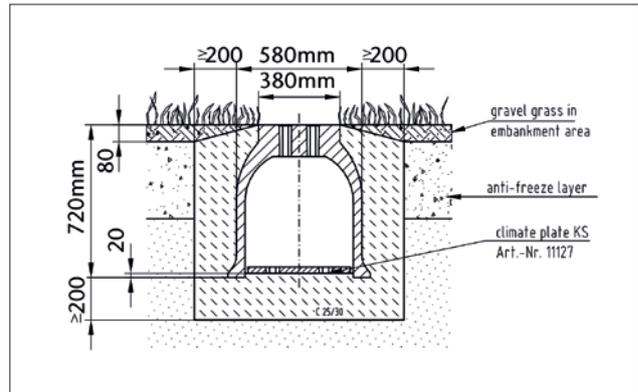

The combined length should extend through the width of the crossing area and safety verges (normally 1.50m from the edge of the trafficked crossing).

The following should also be taken into account:

- Siting of the guide wall.
- The use of closed elements where specially required. Please refer to the details of our Climate Tunnel Solid and Slotted Top or to our Design Services department for further details.

B 125 installation

C 250 installation

Installation

STEP 1

When asphaltting is completed, cut the surface out to a width of 1000mm or to suit the width of the digger bucket or other special requirements. For installation flush with the surface, excavate the trench for the foundation to a depth of approx. 900mm.

C250 installation: Lay a C 25/30 concrete footing of approx. 200mm thick-ness and compact onto a load-bearing foundation.

B125 installation: Lay two footings of C25/30 concrete footings of approx. 200mm thick and 25mm wide, at 45mm spacing.

STEP 2

Position the tunnel and entrance elements on this concrete footing to the correct line and level. Lay the individual elements so that they butt tight up against each other.

Fill the voids on each side of the tunnel with C 25/30 concrete and compact evenly in layers on both sides. The final top level of the concrete will depend on such factors as the thickness of the asphalt binding and top courses. The top of the concrete should be approx. 80mm below the upper surface of the tunnel, sloped upward towards channel.

STEP 3

Next, repair the surface either side of the tunnel. If rolled asphalt is used, do not roll over the line of the channel. Take care to ensure that the space is not overfilled or underfilled.

The Climate Stilt Tunnel system can also be installed before the top course is laid. Care should be taken to ensure an even height at the join between the surface of the tunnel and the top course and that there are also expansion joints at the edge of the concrete surround.

STEP 4

Lay a gravel bed in the verge areas before and after the tunnel. Clean any residual concrete and/or asphalt from the floor of the climate tunnel.
