Hello,

Thank you for providing the Fire Truck Turning Analysis. The engineer took the specifications of our largest Fire Truck to map it out on plans C-106A and C-106B. These plans show that the truck is able to maneuver through the proposed site. The swept pass analysis indicates on the plans that the truck is able to turn throughout the site.

Also, thank you for confirming that all Fire Access roads will have an asphalt base surface to properly support Fire Trucks.

The Fire Department has no further comments at this time. Please feel free to contact me if you have any additional questions.

-Joe
