Re: Certificate of Completion – Chilson Park Playground Expansion

Dear Conservation Commission Members:

The playground expansion project on Beaver Street has been constructed in general conformance with the original plans, and revised amended plan dated June 28, 2022, as approved by the Commission.

The flood storage mitigation area was shifted and reshaped to maintain site access for maintenance. It remains outside of the riverfront and wetland buffer zones and has maintained its storage volume.

An existing leaching basin was discovered during construction near the practice field, the frame and grate were raised to grade.

The proposed fences were not installed. Additional trees, seating, and concrete walkways for accessibility were added outside of the resource areas.

Attached is a completed Request for Certificate of Compliance along with a red-line plan showing the playground expansion project as it was constructed.

Should you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

Michael Maglio, PE
Town Engineer
