TRI-COUNTY VOCATIONAL HIGH SCHOOL PROJECT NARRATIVE

1.0 Introduction

The existing Tri-County Regional Vocational school site, located at 147 Pond Street in Franklin, The existing school building, constructed in 1977, is a multi-level steel framed, masonry clad building of approximately 285,000 square feet. The school has a current capacity of 1,000 students (including 100 staff) and the proposed program is designed to accommodate the same student/staff population. The site is approximately 60.5 acres. There have been no additions.

The property is abutted by single family residences to the North and West. Larger condominium complex is located to the South/Southeast of the existing site. An open, wooded lot owned by the Town's Affordable Housing Trust is located to the east. The existing site has frontage along both Pond and Old West Central Street. The site slopes downgradient 80-100 feet in height from north/northwest to south/southwest, with the high point northeast of the property and the low point(s) at the bordering vegetated wetlands resource areas along the south and southwest portions of the site. All proposed development will occur on the northern/eastern sides of the wetlands delineation.

1.1 Existing Conditions

The Plan entitled T-1 "Topographic Plan of Land" (by Samiotes Consultants, Inc. last revised March 18, 2024 illustrates the existing conditions, topography, wetland resource areas, vegetation/trees, and hardscape areas using field survey data.

1.2 Regional Context

Land use surrounding the property is a single-family and multi-home residential area, with an open wooded lot located to the East of the school. A Site Locus Plan is located on the Plan Cover sheet and depicts the context of the property in relation to the neighborhood.

1.3 Resource Areas

On March 23, 2023 and February 1, 2024, Brad Holmes of ECR delineated the wetland resource areas throughout the property. The limits of the wetland resource areas are represented on the Topographic Plan of Land, noted in Section 1.1, and was used as the base plan in developing the proposed site improvements.

Wetlands were delineated in accordance with the procedures established in the Massachusetts Wetlands Protection Act Regulations (310 CMR 10.00) and the Town of Franklin Wetlands Bylaw. Numbered and sequence flags were placed in the field to identify the limit of wetland resource area.

An Abbreviated Notice of Resource Area Delineation (ANRAD) was filed with the Town, with an Order of Resource Area Delineation (ORAD) being issued in April 2024. A Notice of Intent (NOI) is currently on file with the Conservation Commission and will be permitted concurrently with the Site Plan Review through the Planning Board.

2.0 Project Description

The Tri-County High School development will include a new a compact, three-story, rectangular design fitting into the available buildable area into the sloping behind the existing school. The building will be located on a newly created level area located in the area currently being used as a solar field

Tri-County Vocational High School Site Plan Review - Project Narrative April 8, 2024 Page 1 of 9

(The solar field is anticipated to be dismantled and removed in June of 2024). The new school building will be accessed by both the existing driveway (reconfigured to accommodate the proposed development) and a new emergency access drive from the existing access road. The main entrance will be the focal point of the new entrance drive; framed by the three-story vertical stair tower and sloping roof of the library/learning commons. The proposed site include updated athletic fields, parking/drive aisles, pedestrian connectivity (via sidewalks), landscaping, new utilities and a proposed stormwater management system designed in accordance with the Massachusetts DEP Stormwater Standards, as well as the Town of Franklin Stormwater Bylaw. The existing school building will be demolished and removed as part of later construction phases, once the new school building is constructed and is in full operation.

3.0 Stormwater

A proposed stormwater management system is proposed to accommodate an increased rate of runoff and stormwater designed in accordance with the Massachusetts DEP Stormwater Standards, as well as the Town of Franklin Stormwater Bylaw. The full Stormwater Management report is included under separate cover and is being formally reviewed as part of the Notice of Intent submission filed with the Conservation Commission.

Soils:

Soils on the site consist of a mix of hydrological "C", and "D" Soils. The soils resource report, and test pit results conducted on January 16 and March 12, 2024 are located in the Appendix of this report (Note: Two separate reports are included by OTO, Project geotechnical engineers). Soils were generally found to be glacial till with low hydraulic conductivity results (K values < 1ft/day based on infiltrometer testing). Groundwater elevations fluctuated between 3'-9' depending on locations.

Existing Stormwater Management:

The site is 60.3± acres in size, with the existing school building, constructed in 1977, a multi-level steel framed, masonry clad building of approximately 285,000 square feet and existing athletic fields. Per the Record documents (Original 1975 construction drawings) and our on-site existing conditions survey (See: Sheet T-1), the existing stormwater management on the property consists solely of stormwater conveyance with a series of swales, catch basins and drainage manholes, and excludes any use of Best Management Practices (BMPs) throughout the site to meet the MassDEP Stormwater Standards for stormwater. The site does not include mitigation for stormwater quantity or quality. All stormwater runoff appears to be conveyed (untreated) from the North and East portions of the property to low-lying wetland resource areas along the western and southern portions of the property before flowing off-site.

Proposed Stormwater Management System:

The proposed post-development stormwater management system consists of a series of catch basins/drain manholes/water quality units that convey site run-off to one of four (4) underground detention and/or infiltration systems. Detention system #1 is located to the east of the proposed school building within the rear driveway, Detention system #2 is located Southeast of the proposed school building and east of the parking lot area, Infiltration system #3 is located west of the new building within the new front parking lot, and Infiltration system #4 is located within a new parking lot near the site entrance. The underground systems ultimately discharge to existing wetland resource areas and the project's Point of Analysis. It should be noted that underground lined detention systems are being proposed in earthwork cut areas that are within the determined maximum groundwater elevations; as such infiltration requirements for these areas will not be met.

Tri-County Vocational High School Site Plan Review - Project Narrative April 8, 2024 Page 2 of 9

4.0 Utilities:

All existing utilities serving the school will remain in constant operations throughout the construction of the new school in order to serve continuing school operations.

Water Service

Existing Conditions:

According to Record documents (Original 1975 construction drawings), Tri-County Technical High School is serviced by an 8" water main that runs north up Tri-County Drive and loops around the main building. The building is serviced by a 6" Domestic line (Note: The building is not sprinkled so there is no separate fire protection line). Per the original documents, this water service is connected to an 8" water main (Cast Iron) that runs within Old West Central Street. Additionally, there are five (5) existing hydrants located throughout the site. Finally, there appears to be a booster pump station assumed to increase domestic water service pressure to the building. Per communication with the Plumbing Engineer, it is our understanding that there is an interior booster pump located within the building. Proposed

This design option includes the addition of a new 8" water line that will be connected to the existing 8" Ductile Iron Main in Tri-County Drive (per existing conditions survey) and will extend to the school along the proposed new emergency access drive located at the southern portion of the site. The 8" water main (Final size to be confirmed by Plumbing Engineer) will then loop around the proposed building footprint. A designated fire protection line will be tapped off the water main loop and will connect to the building's mechanical room to serve the new school's fire sprinkler system. A separate domestic water line will be tapped off the same water main loop and will enter at the mechanical room. Capacity requirements are being evaluated by the MEP to confirm the size of the proposed main/services(s). Please note that a portion of the existing 8" water main is proposed to be maintained to service the two (2) outbuildings located to the North as well as provide water for irrigation of the athletic fields. Upgraded water services will be provided for each building and the irrigation system. The site will have six (6) fire hydrants dispersed at various points along the water main loop around the site.

The majority of the existing 8" water main loop around the existing building may be abandoned, but is being reviewed and will remain in-tact for any future potential water needs that the site might have, specifically near the proposed fields at the western parts of the sites.

Sanitary Sewage

Existing Conditions:

According to record documents (Original 1975 construction drawings), Tri-County Technical High School is serviced by 6"-8" VC sanitary lines that run parallel on the north and south sides of the existing gym. The sanitary service extends along the access drive to the main entrance and the north side of the gym. All sanitary service connections appear to exit to the west. An 8" VC sewer main extends south along Tri-County Drive and ties into the municipal system within Old West Central Street.

Proposed

For the new construction design option, most of the existing sanitary sewer infrastructure will be removed/abandoned in place. However, part of the existing sanitary mains will be kept to accommodate new services at the maintenance buildings near the proposed fields. Two (2) new grease traps will be provided at the northeast of the school's footprint near the kitchen, as well as the southwest corner. A new 8" SDR 35 sewer service will tie into the existing sewer main in Tri County Drive, and will run up the proposed access drive located at the southern portion of the site.

Tri-County Vocational High School Site Plan Review - Project Narrative April 8, 2024 Page 3 of 9

Gas Service

Existing Conditions:

The existing gas service enters the building near the front lobby adjacent to the domestic water service. Additionally, it appears that gas main extends to the rear of the property and connects to the building adjacent to the cafeteria.

Proposed:

A new 2" high-pressure gas service line is proposed to service the school, and will be fed from existing infrastructure in Tri County Drive. The gas line will also run along the southern access drive before entering at the school's mechanical room. The gas line will have a new gate valve and gas meter.

Electric & Communication Services

Existing Conditions:

Overhead wires and utility poles running along Old West Central Street and north up Tri-County Road provide primary service to the school. The overhead utilities are directed Northeast through the woods via a utility easement. Telecom services also appear to follow the same path (overhead wires to underground feed).

Additionally, a solar farm was installed approximately 5-6 years ago. It is assumed that this facility supplements the campus electrical use, in addition to feeding unused power back to the electrical grid. The proposed design will require the removal of the solar farm. The solar farm will be removed as part of this project in order to site the new school building.

Proposed:

The primary electric service will run along the new emergency access drive at the southern portion of the site before connecting to multiple transformers at the rear (Eastern) part of the site. Overhead wires will extend from the existing main drive, along the current easement to new utility poles before going underground and routing along the new access drive. New secondary services will then enter the school at the new building's electric distribution room at two locations. Two (2) new emergency generators are also proposed and located near the proposed transformers. It is anticipated that communication cables will follow a similar path as the proposed electric cables. Electrical service to the school will remain uninterrupted throughout construction.

5.0 Traffic:

The existing and proposed student population and support staff will remain the same as part of the proposed program (1,000+/- students; 100 administrative staff). While there is a new emergency access road proposed as part of the reconfigured site design, the traffic pattern will remain relatively the same. Currently, access to the school is provided via curb cuts on Old West Central and Pond Streets. One main two-way access point is provided off of the main driveway to parking areas and secondary drive aisles surrounding the school. The existing two-way access driveway will remain and be reconfigured slightly to the north.

Brennan Consulting is the project traffic engineer and has supplied a traffic memo (dated April 3, 2024) that is included as part of this submittal.

FORM P

APPLICATION FOR APPROVAL OF A SITE PLAN

To the Franklin Planning Board:

The undersigned, herewith, submits the accompanying Site Plan entitled Tri-County Regional Vocational Technical High School for approval under the provisions of the Zoning By-Laws of the Town of Franklin covering Site Plans.

- Name of Applicant: <u>Tri County Regional Vocational Technical School District</u> Address of Applicant: <u>147 Pond Street</u>, Franklin, MA 02038 Phone No.: <u>508-528-5400x101 Email</u>: <u>maguire@tri-county.us</u> (Karen Maguire - Superintendent)
- Name of Owner (if not the Applicant):
 Address of Owner:
 Phone No.:
 Email:
- Name of Engineer: Stephen Powers, PE, Samiotes Consultants, Inc. Address of Engineer: 20 A Street, Framingham, MA Phone No.: 508-877-6688x14 Email: spowers@samiotes.com
- 4. Deed of Property recorded with Norfolk Registry of Deeds in Book<u>5113</u>, Page <u>538</u>, (or Certificate of Title No.____)
- 5. Location and Description of Property: <u>Tri-County Regional Vocational Technical High School,</u> <u>147 Pond Street, Franklin, MA</u>

Square Footage of Building(s) <u>156,000</u> Assessor's Map <u>259</u> Lot <u>004</u>

- 6. Purpose of Site Plan: <u>Redevelopment of existing school</u> <u>campus. Proposed new school building and associated</u> reconfigured vehicular and athletic areas
- 7. List of Waivers Requested (if any): Attach Form R for each waiver

Print Name of Applicant Karm M. Maquire Signature of Owner

CERTIFICATE OF OWNERSHIP

I the undersigned Applicant, do hereby certify to the Town of Franklin, through its Planning Board, that all parties of interest to the below-listed plan are identified in Section B: below,

SECTION A:

Title of Plan; Tri-County Regional Vocational Technical High School

Date of Plan: <u>3/18/2024</u> Assessor's Information: 259-004

Prepared by: Drummey Rosane Anderson, Inc., Samiotes Consultants, Inc.

Type of Plan: 81-P; Prelim.; Def.; Site Plan

SECTION B:

Name of Record Owner(s): Tri-County Regional Vocational Technical School District

Address of Record Owner(s): <u>147 Pond Street</u> Franklin, MA 02038

*If in the name of a Trust, Corporation or Partnership, list the names and addresses of all Trustee(s), Corporate Officer(s) or Partner(s):

*If in the name of a Trust or Corporation, list the Beneficiary(ies) of the Trust or the Shareholder(s) of the Corporation:

*If in the name of a Trust or Corporation, list the date, county, book and page of recording of the Trust Instrument, or the date and State of incorporation:______

Town of Franklin Conservation Commission

NOTIFICATION TO ABUTTERS

Under the Massachusetts Wetlands Protection Act And The Franklin Wetlands Protection Bylaw

In accordance with the second paragraph of Massachusetts General Laws Chapter 131, Section 40, you are hereby notified of the following proposed project:

Stephen Powers has filed a Notice of Intent with the Franklin Conservation Commission for the Tri-County Regional Vocational Technical High School on 147 Pond St, Franklin, MA 02038, under the Wetlands Protection Act (M.G.L c.131 §40).

Copies of the Notice of Intent may be examined during regular office hours at 20 A Street, Framingham, MA 01701-4102

Copies may also be examined by contacting the Franklin Conservation Department located at 355 East Central Street, Franklin, MA, (508) 520-4929.

Notice of the public hearing including the date, time, and place will be published at least five (5) days in advance in the Milford Daily News.

Notice of the public hearing including the date, time, and place will be posted in the Franklin Town Hall at least forty-eight (48) hours in advance of the public hearing.

The public hearing will be held on Thursday, April 18, 2024, at 7:00 pm, via Zoom, and can be accessed through the Conservation Commission agenda for that night, which will be posted on the Town's website 48 hours prior to the meeting. Please call the Conservation Department at (508) 520-4929 if you have any questions.

You may also contact the Massachusetts Department of Environmental Protection, Central Regional Office, Worcester, MA at (508) 792-7650.

Subject: Exterior Noise Conditions & Noise Control Recommendations Tri-County Regional Vocational Technical High School Franklin, MA Acentech Project Number J637620.01

Dear Daniel,

This report presents the results of the community noise study Acentech has conducted at Tri-County Regional Vocational Technical High School in Franklin, Massachusetts, and related mechanical noise control recommendations based on the Schematic Design mechanical documents dated June 27, 2023 and the mechanical cutsheets sent to us February 6, 2024. The study was performed from February 1, 2024 to February 9, 2024.

APPLICABLE NOISE REGULATION

The town of Franklin, MA does not have a quantitative Noise Ordinance that relates to noise levels from outdoor mechanical equipment, and so the Massachusetts Department of Environmental Protection (MassDEP) regulations would apply. Therefore, Tri-County Regional Vocational Technical High School is subject to MassDEP regulations which prohibits the generation of noise that exceeds the ambient background noise level by 10 or more A-weighted decibels (dBA); MassDEP's policy also prohibits outright the generation of any pure tone conditions. Pure tone conditions are defined as noise emissions in one particular octave band exceeding those in adjacent octave bands by 3 decibels or more.

Based on this information, noise control measures aimed at satisfying the MassDEP regulations.

STUDY METHODOLOGY

Acentech's measurement equipment for this study consisted of one outdoor noise monitoring kit which was installed in the south of the school parking area. The monitoring kit was comprised of a Rion NL-52 sound level meter, an external power source, an extension cable for the sound level meter microphone, a flexible mount, and a crate in which to store everything that did not need to be out in the open. The crate was secured to firmly rooted object (in this case a tree) by means of a chain and padlock. Photos of on-site conditions can be found in the Appendix as Figures 1 and 2, and an aerial view showing monitor location in the context of the school property is included as Figure 3 in the Appendix.

The metric of greatest interest to this study was the A-weighted L90, or the sound level in dBA which was exceeded 90% of the time during the measurement period. The monitoring kit collected this information, as well as several other metrics, on an hourly basis. Other metrics displayed in the graphs in the Appendix are the LAeq, which is a commonly used metric representing the approximate average sound level over the measurement period, and the LAO1, which is a metric that illuminates information about short-duration high-noise events.

ANALYSIS

Figures 4 in the Appendix shows the data collected over time at the monitoring location. The quietest hours were generally from midnight to 5 am. The lowest measured L90 was 33 dBA. Average L90 readings during daytime hours (considered in the field of acoustics as lasting from 7:00 am to 10:00 pm) were generally in the range of 36 to 46 dBA. This would imply that the strictest probable (non-tonal) noise limits for this project site are **43 dBA** at night and 46 dBA during the day.

PLANNED EQUIPMENT OVERVIEW AND POTENTIAL IMPACTS

The outdoor HVAC equipment planned for this project consists of 11 outdoor packaged-cooling energy recovery units, and select small tonnage unitary condenser units. The energy recovery units are listed on their data sheets as producing radiated sound power levels of approximately 92 dBA each.

The presumed property lines at 1810 Franklin Crossing Road and 357 Mucciarone Road are 250 feet away from the nearest ERUs, on either side of the school, and are the critical receivers of interest, shown in Figure 3. The ERUs in the central area of the school, Parts B & C, are 500 feet away from critical receivers of interest. We will base our noise control recommendations on meeting the required levels at these property lines for these nearest units.

RECOMMENDATIONS

Based on the discussion in the Analysis section above, we recommend the following course of action to make this project's design compatible with the applicable noise regulations:

Exterior Noise

- The daytime noise limits for the project are met as is.
- The nighttime noise limits for the project we expect will also be met, as school ERUs often do not run at nighttime, and warmup at 7:00am or later.
 - We will continue to work with you and the team to be sure the design continues to meet the MassDEP regulations.

* * * * * *
We hope that this information is helpful to you. We are available to answer any questions or concerns that may arise on this subject. I am most easily reached by email at <u>ememarzadeh@acentech.com</u>, and Acentech's Principal-In-Charge for this project, Nicole Cuff, can be reached by email at <u>ncuff@acentech.com</u> or by phone at (617) 499-8070.

Sincerely,

Memor

Esmaeil Memarzadeh, Ph.D. Consultant

REFERENCE: Site Plan Review Tri-County Regional Vocational Technical School 147 Pond Street Franklin, Massachusetts

Dear Mr. Glazer,

As requested, Bryant Associates, Inc. (Bryant) has conducted a review of the site plan for the construction of a new school building on the same site as the existing Tri-County Regional Vocational Technical School (Tri-County), which is located at 147 Pond Street in Franklin. Access to the school will continue to be provided through the existing two-way driveway, otherwise known as Tri-County School Road, on both Pond Street and Old West Central Street. There is one proposed driveway that will access the school site from Tri-County School Road. There will be two exit lanes from the proposed driveway, one for left turns and one for right turns. The proposed driveway is approximately in the same location as an existing driveway. Tri-County services and can have students from the following communities: Franklin, Plainville, Medfield, Seekonk, Medway, Sherborn, Millis, Walpole, Norfolk, Wrentham, and North Attleboro. The school currently has an approximate student population of 1,000 students. It is anticipated that the new school will accommodate a student population of no more than 1,000 students.

Since the number of projected students is expected to be the same as the existing student enrollment, it is anticipated that there will not be significant changes to the site traffic operations or significant changes to the impacts to the surrounding roadway network under proposed conditions as compared to the existing conditions.

It is proposed that all traffic will enter the school site from Tr-County School Road through the proposed driveway. Once on site, bus traffic and private vehicle drop-off/pick-up traffic will be separated with buses proceeding to the back of the school building to drop-off/pick-up students at the rear of the building with dedicated bus only lanes. Private vehicle drop-off/pick-up will occur separately in the front of the school building. There will be various parking lots for staff, student, and

Mr. Daniel Glazer, AIA, LEED AP April 3, 2024 Page 2 of 2

visitor parking throughout the site. The loading area will be at the back of the school, away from the majority of the on-site traffic and within the area of the site that is located beyond vehicle access gates. A secondary emergency access road to Tri-County School Road is provided. Sidewalks and crosswalks are provided throughout the site.

The site plan will allow for the safe movement of pedestrians and vehicles within the site. The circulation allows for the separation of the bus drop-off/pick-up and private vehicle drop-off/pick-up. In addition, the bus drop-off/pick-up located in the back of the school is separated from the majority of the school traffic. There appears to be sufficient space for the buses to queue. There is approximately 320 feet of space available in the front of the school between the bus access points for private vehicles to queue. There is approximately 200 feet of additional queuing space to the west of the bus access exit, prior to the internal intersection where the buses turn left from the main driveway to access the back of the school.

We offer the following recommendations for the design team to consider: (1) install wayfinding signs within the site to direct vehicles to parking areas and bus/private vehicle pick-up/drop-off areas, (2) install pedestrian crossing signs at the crosswalk across the main driveway, near the baseball field, and (3) ensure the vegetation is eliminated or kept low within the sight triangles at the intersection of Tri-County School Road and the proposed main driveway.

We are prepared to review this analysis with you at your convenience. If you have any questions or comments, please do not hesitate to contact me at 401.834.1063 or tbrayton@bryant-engrs.com.

Very truly yours BRYANT ASSOCIATES, INC.

APPENDIX 5: WAIVERS REQUEST April 04, 2024

Town of Franklin Planning Board ATTN: Amy Love, Town Planner 355 East Central Street Franklin, MA 02038

Re: Tri-County Technical Regional High School Project 147 Pond Street Planning Board – Site Plan Review submittal SCI#: 52033.02

Dear Ms. Love:

As part of our Site Plan Review submission, we are preparing this letter for submission to request site plan waivers.

For the Tri-County Technical Regional High School submission, we hereby submit this request for waivers to the following Franklin Zoning Bylaws Code Sections:

- (1) **<u>185-36 Impervious Structures</u>** defined as, "The maximum coverage by structures plus paving shall be as regulated in the Schedule of Lot, Area, Frontage, Yard, and Height Requirements and, within the Water Resource District, as regulated in § 185-40. Greater coverage within the Water Resource District may be allowed pursuant to \$ 185-40D(1)(l). Greater coverage than allowed under the Schedule of Lot, Area, Frontage, Yard, and Height Requirements within other districts may be allowed on special permit from the Planning Board upon its receipt of calculations prepared by a registered professional engineer indicating that stormwater runoff from the site will not be increased following the development." The submitted planning board plan set shows a zoning table and the values assessed per the requirements by the Town of Franklin Zoning Bylaw of 25% maximum impervious coverage and the proposed site impervious coverage is 27.5%. The existing site development impervious coverage is 28.5%, which is pre-existing, non-conforming condition. Overall we are reducing impervious site coverage in the post-development scenario, so we are requesting a waiver from the Planning Board for maximum impervious site coverage.
- (2) <u>185-31.C.2.A regarding Plan size</u> the Eleven 24 x 36 inch, folded copies of the site plan along with six 11 x 17 reduced size copies of the site plan. The submission for the planning board is 36x48 inch for full proposed plan set plans. Existing Conditions plan are 30"x42". Due to the large lot area (60+ acres), we are requesting the Planning Board accept larger sheet sizes in order to reduce the total number of sheets.

The submission includes everything mentioned within the attached narrative and provided site plans. If you have any questions, or require further information, please do not hesitate to call Stephen Powers P.E. (508) 877-6688 x14 or myself at x23.

Sincerely,
