

Town of Franklin Conservation Commission

APPLICATION PROCESS SIGNATURE FORM

There are three different applications that can be submitted to undertake work in a jurisdictional area: a Notice of Intent (NOI), a Request for Determination (RDA) and a Minor Buffer Zone Activity (MBZA). All three applications have different criteria for submission and approval and the NOI and RDA are governed by both the state law and the local bylaw. The MBZA is issued under the local bylaw only.

When a potential applicant requests advice from the Conservation Agent on which application to file, the opinion of the Agent is based on the information given by the potential applicant and any other information available to the Agent, e.g. the town's GIS system. The Agent has no legal right to go onto private property at any time until after an application is filed or permission of the property owner is given.

It is important that all applicants understand that after an application is filed, additional information may come to light e.g. via a field inspection or a review of the application, that may impact the scope of the submitted application and the approval process. **Therefore, it is the ultimate responsibility of the applicant to decide which application to file.**

In light of the above, please sign below indicating an understanding of this policy and submit it with the application.

2. PERFORMANCE STANDARDS

2.1. These are the requirements for a Minor Buffer Zone Activity (MBZA)

2.1.1. The Conservation Commission (The Commission) shall presume that activity proposed to occur:

- Exclusively within a previously disturbed or clearly delineated buffer zone; and
- The alteration is less than 1,000 Square Feet or 5% of the buffer zone on the lot, whichever is less; and
- At a minimum, a 25 foot wide area is preserved between the activity and the resource area boundary; and
- The buffer zone does not contain estimated wildlife habitat which is indicated on the most recent Estimated Habitat Map of State listed Rare Wetlands Wildlife; and
- Erosion and sedimentation controls, if required, are provided at the limit of work to protect the resource areas, and
- Shall constitute activities within the buffer zone that would be eligible for a Negative Determination of Applicability with conditions.

2.2. The Commission may determine that this presumption should not apply based on unusual circumstances such as steep slopes, the potential for negative impacts over time or because the proposed project would require oversight through continuing conditions. The Commission may waive any or all of the above requirements if they find that there is an emergency situation. In order for the site to be declared an emergency, a vote of the Commission shall be required.

2.3. In order for a property owner to apply for an MBZA they must meet all of the above requirements and provide a plan of the activity, a detailed project narrative and photographs of the project area. The distance between the proposed project and the wetlands must be noted on the plan and may require delineation if requested by the Commission or Agent. Additional items detailed on the MBZA form or requested by the Commission, or its Agent, may be required. The applicant is required to prove by a preponderance of the evidence that their proposed MBZA will not result in a negative impact to the wetlands.

2.4. The minor nature of these projects will not require the Commission to hold an advertised public hearing on the matter. The Agent shall review the application and may perform a site visit to confirm information provided in the plan, project narrative and photographs. The Agent may request additional information if s/he deems necessary. Upon review of the MBZA application, the commission may issue an approval, with or without conditions, a denial, or require the applicant to provide further information. If the commission issues a denial, the applicant shall be required to file a Notice of Intent if they wish to pursue the activity.

2.5. The work must conform to the plans submitted in the Minor Buffer Zone Activity application and all applicable conditions or modifications imposed by the Commission in the approval. If the applicant fails to perform the work according to the approved plan or in conformance with the applicable conditions of the approval, the permit will be revoked. Failure to conform to the plans and specifications shall constitute grounds for requiring a Notice of Intent and/or an Enforcement Action, including fines, by the Commission.

2.6. Upon completion of the project the applicant shall notify the Agent. The Agent shall inspect the work for and inform the Commission of the results.

2.7 Minor activities within Riverfront Zone, the 100' buffer zone, but not within the 25' "no touch" zone, and not within 25' of a perennial stream, may be authorized by the Conservation Agent under the following conditions:

2.7.1. The proposed activity will not run counter to the interests of the Wetlands Protection Act;

2.7.2. The proposed activity shall collectively not encompass more than 150 ft² of land area;

2.7.3. The proposed activity shall be only those activities permitted under 310 CMR 10.02 (2) (b) as well as the removal of vegetative debris and trees;

2.7.4. These activities shall be outlined on a MBZA application providing all required information and accompanied by the required filing fee;

2.7.5. All decisions of the Conservation Agent may be appealed to the Conservation Commission following the procedures outlined in section 8 of these regulations;

2.7.6. The agent shall prepare and submit a report, at least monthly, to the Commission on all permits approved under this section.
