RE: 137 Mastro Drive
Franklin, MA
DE Project #: 3070-001
MassDEP File #: CE159-1230

Dear Ms. Goodlander:

This letter is to accompany the submission for an amendment for the existing Notice of Intent for 137 Mastro Drive – MassDEP File # CE159-1230.

The project consists of a single family house, driveway, septic system and other associated improvements located on a 26.12 acre parcel of land. The site is actively under construction.

This amendment includes the work associated with the installation of underground electric and gas services for the house. These services will mainly be located within the footprint of the driveway shown on the previously approved plans, including crossing the stream and wetland areas in the same footprint of the installed culvert. These services are proposed to be installed entirely within areas that were approved to be disturbed as part of the existing project and therefore no further disturbance within any wetland resources, buffers or riverfront area is proposed as part of this amendment. All work will be completed per National Grid Construction Standards which have been included with this submission for reference.

If you have any further questions on this matter, please feel free to contact me at your earliest convenience.

Sincerely,
DiPrete Engineering Associates, Inc.
