Three-phase pad-mounted compartmental type transformer

General

At Eaton, we are constantly striving to introduce new innovations to the transformer industry, bringing you the highest quality, most reliable transformers. Eaton's Cooper Power Series Transformer Products are 50,000 compartmental pad-mounted transformers in 31 different designs, manufactured and tested in order to drive this innovation. We have invested both time and money in the Thomas A. Edison Technical Center and premier research hubs in Princeton, Wisconsin. Such investments produce an advanced transformer design. The Polymer-Insulated Enclosure™ (PIE) and the Enclosure™ (E) have been developed in our Wisconsin plant.

With transformer sizes ranging from 15 kVA to 12,500 kVA and high-voltage ratings from 2400V to 24 kV, Eaton has you covered. From fabrication of the tank and cabinets to winding of the cores and coils, to production of interlocks, switches, tap changers, and more. Eaton has the talent, the tools, the time and the dedication to deliver the highest quality transformers to you. Eaton's Cooper Power Series transformers are available with several oil grades (mineral oil or Enclosure™ PIE™ fluid) and are available with the advantages of using Enclosure™ PIE™ fluid. Both options and solutions for the specific application. The design team has also taken Occupational Safety and Health Administration (OSHA) and Section 49 CFR 192 requirements into account.
