EXECUTIVE SUMMARY

Glenn J Stowers

Accomplished executive with a vast and diverse history. Entrepreneurial spirit showcasing a quantified track record of results. Strengths are focused on identifying skills in others and nurturing them at all different levels of development. This has led to a career full of stability and eclectic ventures with a solid base concept. The items listed below are a representation of some events and time lines up to this point which have shaped the current approach to business.

Graduated from a Burr De Coe Vocational high school in East Brunswick NJ.
1977-1982

Only graduate to attend collage directly from the graduating class.

Completed 2 years Middlesex County college in NJ. No degree.

Completed field specific studies at North Eastern University. No degree.

Cool-It Refrigeration:

1978 through 1984

Technician

While in high school and immediately following I worked summers and breaks at the family owned refrigeration company in Cambridge MA learning mechanical skills and observing grass roots management styles.

Cold-Aire Refrigeration:

1984-1991

Technician

The family organization changed names as partners were augmented. I remained an employee and continued my root education in the mechanical disciplines. During this time I received my education on self-reliance and realized the results of work verses reward.

Building Environments Corporation:

1991-2000

Principal.

BEC (Building Environments Corp) was started as an attempt to stand out from the family organization and identify as an individual. The core concept was to lean on the things I had been taught and not hide in the wings but to gain the opportunity to implement all the things I felt were the correct directions. The largest learning curve of this initial experience was that nothing is as easy as it looks and the real path is a slow methodical, incremental approach.

I continued to focus and developed an affinity for larger clients, a comfort with this type of client was due to early teachings by my father who showed me through example that these larger groups need help just as the smaller do and that if you are interested in solving issues they will embrace the solution; resulting in a reward that is generally larger and ongoing.

EXECUTIVE SUMMARY

Glenn J Stowers

Americas Mortgage Group:

1993-1995

Partner.

As an equal principal Partner, this organization was conceived by me and two other individuals. One was an Accountant and the other was a Mortgage Broker. We devised an interesting view of the then mortgage landscape which included sourcing mortgage funding in one location and transferring it to a larger economic area thereby developing a lower income lending program for limited credit borrowers. The company grew quickly and serviced MA and NY clients. We developed two separate offices and introduced a telemarketing program which led to a robust account base. The conclusion of the organization was triggered by changing banking regulations which made the core profit center less appealing.

Clyde's Grill and Bar:

1995-2015

Manager.

A project that started with me and two other individuals, one of which had been involved in the Mortgage Group. We naively entered the restaurant business under the misconception that if you build it they will come. We quickly found that the landscape was less than inviting as we had a competitive audience that included large national and entrenched local establishments. The timing was not good but we developed a no-quit attitude and ultimately won over the clientele. One partner was dismissed after the initial 18 months which represented a difficult negotiation and has left a strong impression on my management style.

Ultimately the restaurant became one of the entrenched local establishments that still stands and services the community today. I am often approached by the original staff members and told that it was one of the more powerful and enriching times to their lives. I echo that comment.

Intercept Boat Company:

1993-2019

Crew/ Board member.

As a mechanical individual I surrounded myself with individuals who were interested in all things mechanical. Through one of these relationships a desire to develop a stronger faster sea going vehicle (Boat) was born. I was lucky to be invited to participate with a strong willed group of passionate people during this time. Due to this passion and after a lot of hard work we had conceived a workable strategy; this combined with the skill sets of each person involved created a stable and highly functioning prototype water vessel. We felt we had created an exciting and innovative approach to sea worthiness but lacked the testing education to verify our theories. Due to persistence and commitment to the cause we were granted an audience with the marine studies team at MIT. At the conclusion of testing it was established that what had been created was a craft with the lowest vertical acceleration rates in the world. This led to a variety of very interesting events which included getting involved with U.S. Naval Surface Warfare Center (NSWC) and being quantified as developing what would be deemed "The smoothest riding Boat in the world" along with many other classified result accolades. The Boat was intended for sea bound tactical insertion and extraction, Aerial deployment, and night mission delivery of assets. We worked with Navy Seal team 6 in Coronado CA and consulted with many branches of the US government including Navy, Coast Guard, Customs, and Law enforcement.

We were invited to and attended many tests and were one of the only private contractors to be granted use of the drag tanks and weather simulation annex in Carderock VA while working with NSWC. We

were funded through Office of National Drug Control Policy (ONDCP), while demonstrating the vessel to military, law enforcement and riverine compliments throughout the country.

The vessel was/is used today in law enforcement protecting the harbors in NYC as well as Boston, as well as operating as deterrent vessels protecting American oil rigs in Nigeria, and is in development through a joint task force with Grumman and NASA to become an autonomous minesweeper.

Retail Environmental Technologies Corp:

2000-2010

Principal.

The name of the company was augmented to align better to my focus on retail store clientele. Retail Environmental Technologies Corp. ("RETEC") was focused entirely on national retail clients. The preferred profile of a client was small to mid-size box multi location national retail with 500 million in gross revenue and above. RETC provided national consulting, energy management with a strong physical presence providing self-performing service and maintenance to this same clientele.

Mechanical Energy Corporation:

2010-Present

Principal.

I refined the organization again into its current form under a new and more flexible name focused on general expansion to include local HVAC services as well as support for the robust clientele already enjoyed by the company. The new organization, Mechanical Energy Corporation superseded the Retail Environmental Technologies Corp but maintained the RETEC brand as a DBA. The RETEC team is lean and strong demonstrating the ability to maneuver quickly and use time proven methods to satisfy the most demanding of clients. We have secured such major clients as Apple, GAP, Old Navy, Victoria Secrets, H&M, Urban Outfitters, J. Jill, etc. We are recognized as a top vendor supplier by these organizations and are the top-rated vendor in our business sector year after year.

2017-Present

Gavel Public House

Assisted and advised regarding financials for day to day operations. Acted as general advisor on all process and procedures of the entity and participate in expansion plan to control seasonal sales deficiencies.
