

The town will be starting work in the DelCarte Recreation area to improve access to the canoe launch. This work will take place between the parking lot off of Pleasant Street and the pond and will involve removing the wood chips, building a trail to the canoe launch that is ADA compliant, replacing one of the concrete pads in this area and planting new grass.

There has been some delay in starting the work, but it is now scheduled to begin on or about September 13, 2018 and should take about a week to complete. While the work is underway, and for the safety of all, the area may be closed periodically due to the operation of heavy equipment.

Any questions should be directed to George Russell, Conservation Agent at 508-533-4847 or grussell@franklinma.gov.
