Context:	The Franklin Police Department had contact with an estimated (low side) 16,534 persons, including making 203 custody arrests. Out of these contacts, force was used in 0.0544% of these encounters. The actual percentage would be lowered if each person involved in every incident was counted. Our data only counts each incident as 1, not everyone involved who had officer contact. Many incidents involve multiples of people who are not represented in this data. In actuality the percentage of use of force is lower than what is listed here.
