

Take & Make

Apple Core Magnets!

Materials Provided:

- 3 Pieces of Foam:
 - 1 Red
 - 1 Green
 - 1 Yellow
- Apple Template
- 4 Regular Craft Sticks
- 3 Mini Craft Sticks
- 3 Magnets
- Brown & Green Construction Paper
- Paper

Additional Materials Needed:

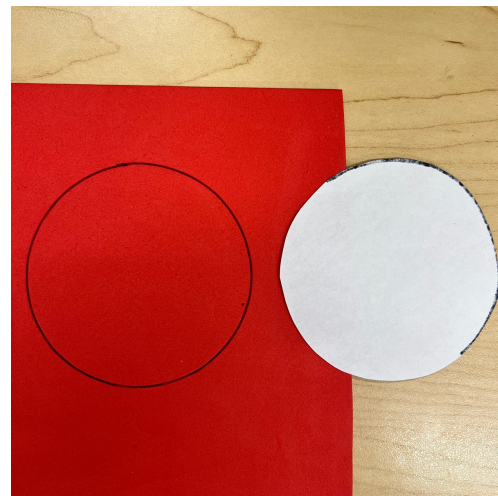

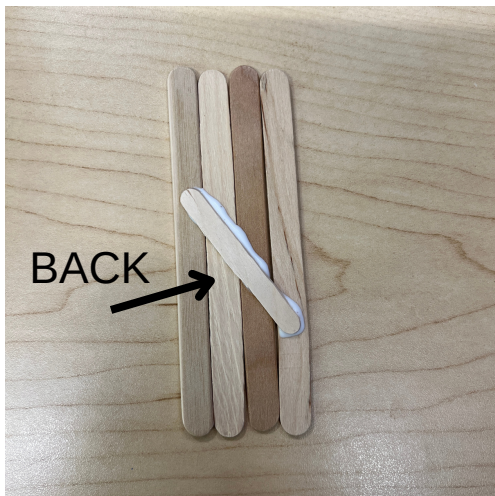

- Pen/Pencil
- Scissors
- Glue
- Tape
- Black Marker

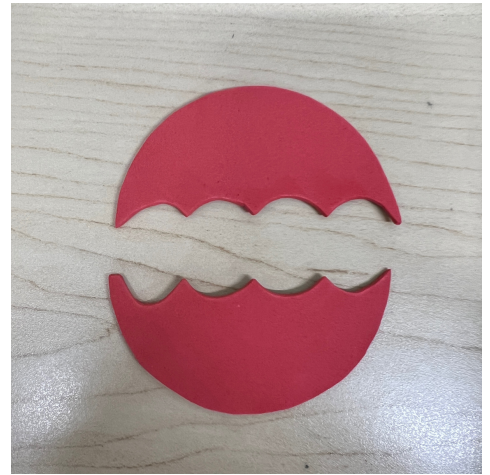

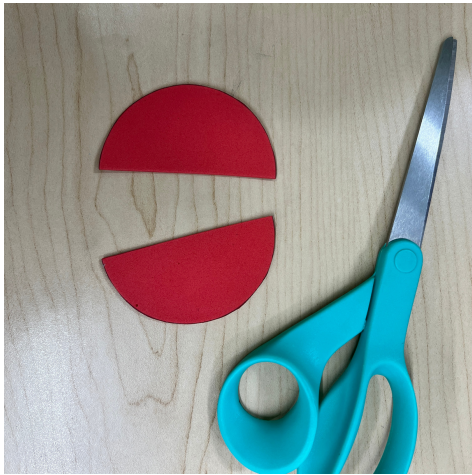

Directions

You have been provided enough materials to make 3 apple magnets (one of each color). The instructions will walk you through making one magnet at a time, but if you want to make all 3 at once you can!

- Begin by lining up 4 of the craft sticks side-by-side.
- Then glue 1 of the mini craft sticks across the back to secure them in place. Set off to the side to allow the glue time to dry.
- While the glue is drying, cut out the circle from the "Apple Template".
- Trace the template onto the foam sheets and cut out.

- Next cut your foam circle in half.
- On each flat side of your semi-circle you want to draw 4 small bites
- Cut along those lines and now your semi-circles will now look like little umbrellas!

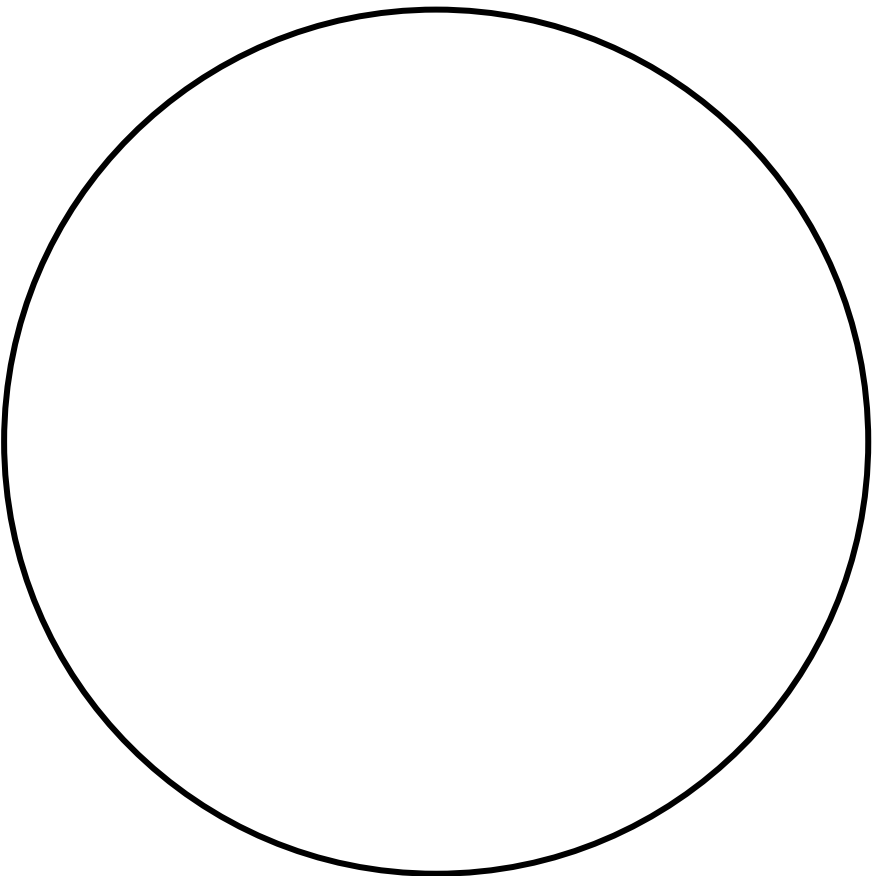

- Use the brown and green construction paper to cut out a stem and leaf for you apple.
 - I suggest making the bottom of the stem and leaf larger than you need so that it's easier to attach to the apple!
- Either glue or tape the stem and leaf to 1 of your semi-circles.
 - If you use glue, wait for it to dry before moving on to the next step.
- Now it's time to bring pack your group of craft sticks from earlier!
- Glue the 2 semi-circles to opposite ends of the craft sticks. Whn doing this there are a few things to remember:
 - The side of the foam that you attached the stem and leaf to should be the side that you glue down onto the craft sticks. This way you don't see any glue or tape on the front of your apple!
 - You also want the mini craft stick at the back, so it's not visible.

- Once everything is dry, use a black marker to draw 3 small seeds onto the "core" of your apple!
- Next add 1 magnet to the back. The magnets are self-adhesive, but if you want you can glue it into place.
- Repeat these steps for each foam sheet! In the end you will have 1 red, 1 green, and 1 yellow apple core magnet!
