

Take & Make

Mini Mega Phones!

Materials Provided:

- Pre-Cut Paper Towel Roll
- Mega Phone Template
- 2 Pieces of White Card Stock

Additional Materials Needed:

- Pencil
- Crayons, or Markers
- Scissors
- Glue Stick
- Tape
- Ruler

Directions

- Take your pre-cut paper towel roll, line it up to the edge of a piece of white card stock and using a pencil, make a mark to indicate the length of the roll.
- Move the roll out of the way and extend the little mark you made across the entire page (a ruler helps with this).
 - It works best if you're line is going across the shorter length of the paper, so that when you're wrapping the paper around the roll you don't have a ton of excess.
- Cut the paper along the line and then color however you wish!

- Once the paper is colored to your liking, tape one end of it to the roll.
- Tightly wrap the paper around the roll and secure the end with glue. Tape would also work instead of glue.
- Take the tube and make lots of little vertical cuts around on end. Fan out the tabs; this will help hold the cone and make it easier to secure in place.

- Next, cut out the cone and handle template. Then, trace the pieces onto the second piece of white cardstock.
 - You could just use the cone and handle as is, without tracing them, but I find using the cardstock for the pieces works better because the paper is sturdier.
- Once traced, color the cone and handle to your liking and then cut them out!
- Wrap the cone piece around and secure the ends with a piece of tape. (Glue works too, but I found tape to be easier.
 - BEFORE securing the cone together with tape be sure to measure the smaller opening around the tube so that you get a snug fit!

- Slide the tube through the cone and secure in place with a piece of tape.
- I decided to wrap some yarn around the tube to hide where I taped the cone in place. Feel free to add similar embellishments if you want!

- Place the handle color side down and fold a small section of each end back to create little tabs.
- Lastly, either glue or tape the tabs of the handle to the tube.
