

Take & Make

Polar Bear Bookmarks!

Materials Provided:

- Polar Bear Template
- White Construction Paper
- Gray Construction Paper
- Pink Construction Paper
- Black Construction Paper
- Red Construction Paper

Additional Materials Needed:

- Scissors
- Glue
- Black Marker

Directions

- Cut out all of the bookmark pattern pieces.
- Trace the template pieces onto the color construction paper and then cut out the pieces for your polar bear.
 - White - body and arms
 - Gray - belly and inner ear pieces
 - Pink - cheeks
 - Black - nose
 - Red* - scarf

**We provide red paper for the scarf, but if you have another color at home that you would prefer to use for the scarf, you may!*

- Cut a slit along the scarf piece. Be sure you **don't** cut all the way across!

- Glue the nose in the middle of the polar bear's head.
- Glue the inner ear pieces in the middle of the ears.

- Glue the cheeks to either side of the nose.
- Glue the grey belly piece in the middle of the polar bear's body.
- Apply glue along the sides of the polar bear's shoulder and attach the arm to the bear's body.

*Be sure to keep most of the arm free from glue, so your polar bear can "hug" your book's page.

*It's okay if the edge of the arm does not line up perfectly with the body of the polar bear.

- Once the glue is dry, trim the extra arm paper so that the arms align with the polar bear's body, as shown below.

- Use a marker or pen to draw the face of your polar bear.
- Glue the scarf onto the polar bear by sliding the slit through the neck and applying glue to secure the scarf in place.
 - It should look like part of the scarf is tucked behind the polar bear!

- Slide your polar bear bookmark into your book to hold your place!
