

# Take & Make Rainbow Twirler!

## Materials Provided:

- Paper Plate
- Yarn
- Green Cardstock Hearts

## Additional Materials Needed:

- Paint and Paint Brush
- Scissors
- Glue
- Tape or a Hole Punch

## Directions

- Paint both sides of the paper plate in rainbow stripes. You could also use markers or crayons, but paint works best.
- Once the paint is dry, start from the outside of the plate and cut a spiral all the way to the middle. The thinner the bands the longer your spiral will be.

- Tape both ends of the yarn to the center of the the plate. Now you have a loop so you can hang your finished twirler!
  - If you have a hole puncher, you could also punch a hole in the very center of the plate, thread the yarn through the hole and tie the ends together.

- To make the shamrock decorations cut out the green cardstock hearts.
- Glue the points of three hearts together to make a little shamrock.
  - There are enough hearts to make 6 shamrocks, but feel free to make more with your own green paper (or white paper colored green!)
- Lastly, glue the shamrocks onto the twirler.

**Now hang it up and watch it twirl!**
