

Take & Make

Mini Photo Magnets!

Materials Provided:

- 2 Wooden Rings
- Paint Set & Brushes
- Bristol Paper
- 2 Magnets w/adhesives

Additional Materials Needed:

- Super Glue
- Photos

Directions

- Trace the rings onto the Bristol paper and cut out.
- Trace the paper cut out onto the photo you want to use and then cut out the photo.
 - You might have to trim the photo small after you initially cut it out in order to get the sizing right!
- Paint the wooden rings!
- Once fully dry, apply the Bristol paper to the ring with super glue.
 - TIP #1: You want to put the glue directly onto the back of the ring in a "U" shape going from the 2 widest points of the ring.
 - TIP #2: Also, try to place to glue towards the outer edge of the ring.
 - TIP #3: DO NOT glue all the way around the ring! You want to leave an opening so you can slide the photos in and out.
- Add a magnet to the back. You can use the provided adhesives to do this, or you can use the glue, whichever you prefer.
- Add your photos and hang!
